The Big Picture

THE BIG PICTURE

What is Gemlato?

A modern gelato brand focused on **high-quality ingredients** and a **premium experience** both in-store and online.

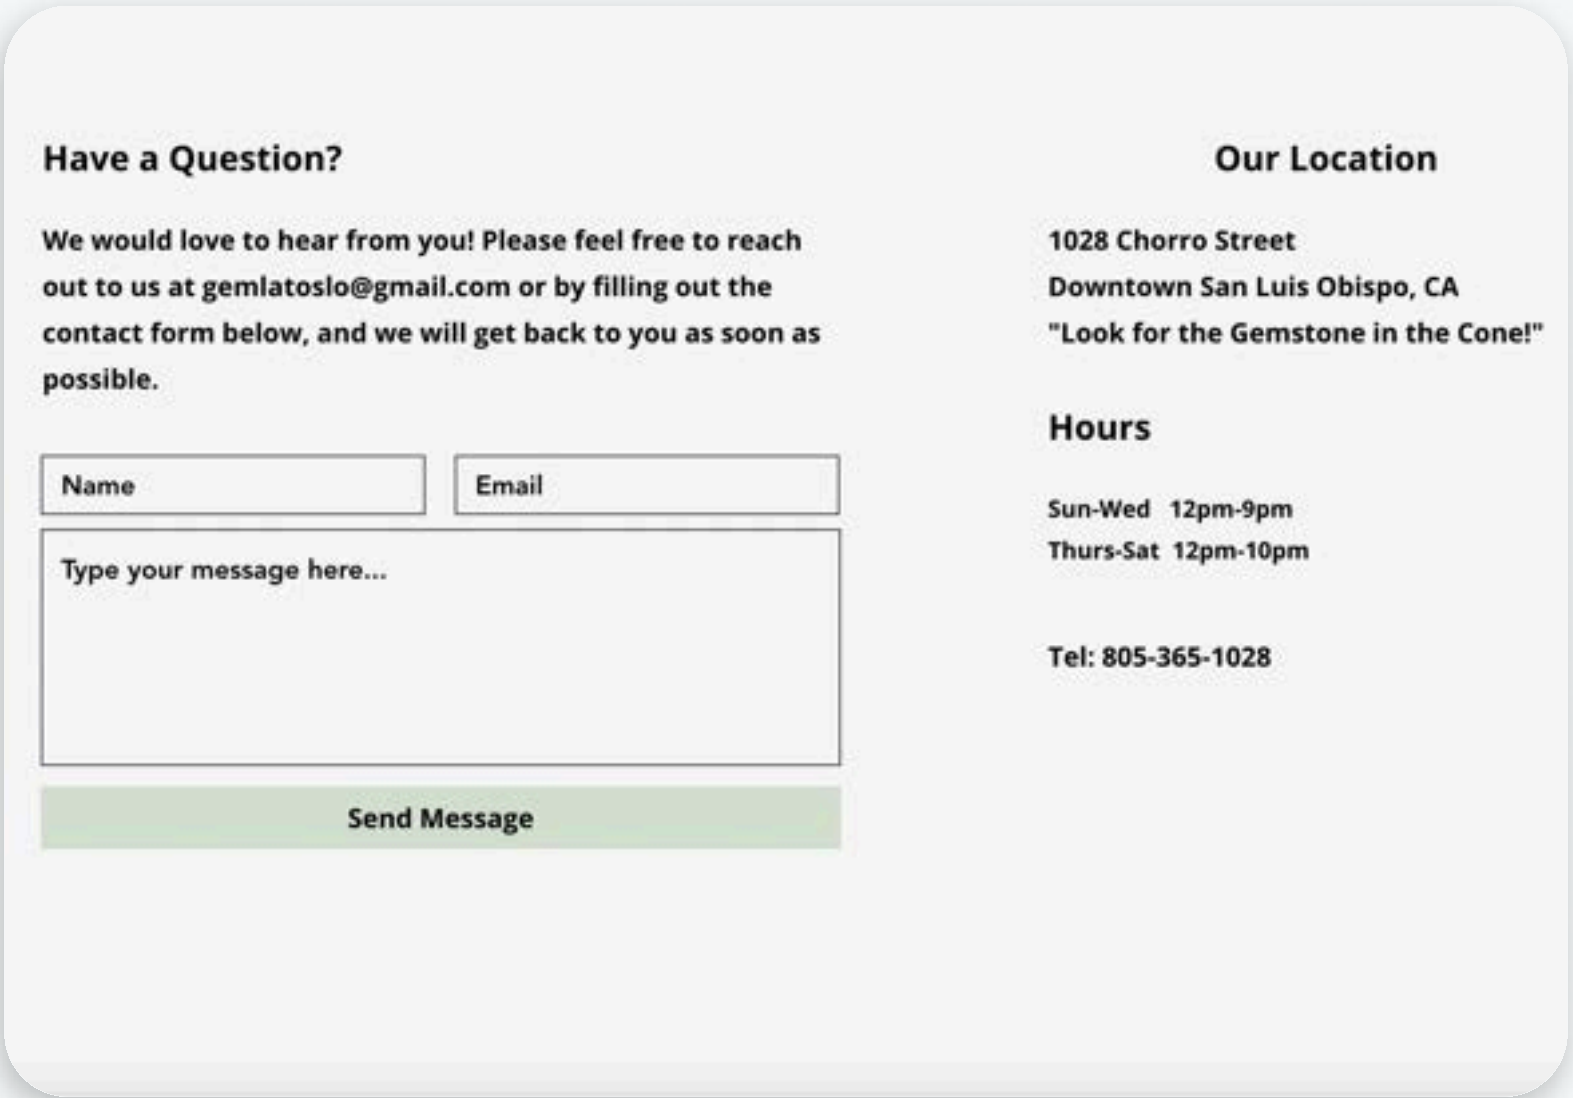

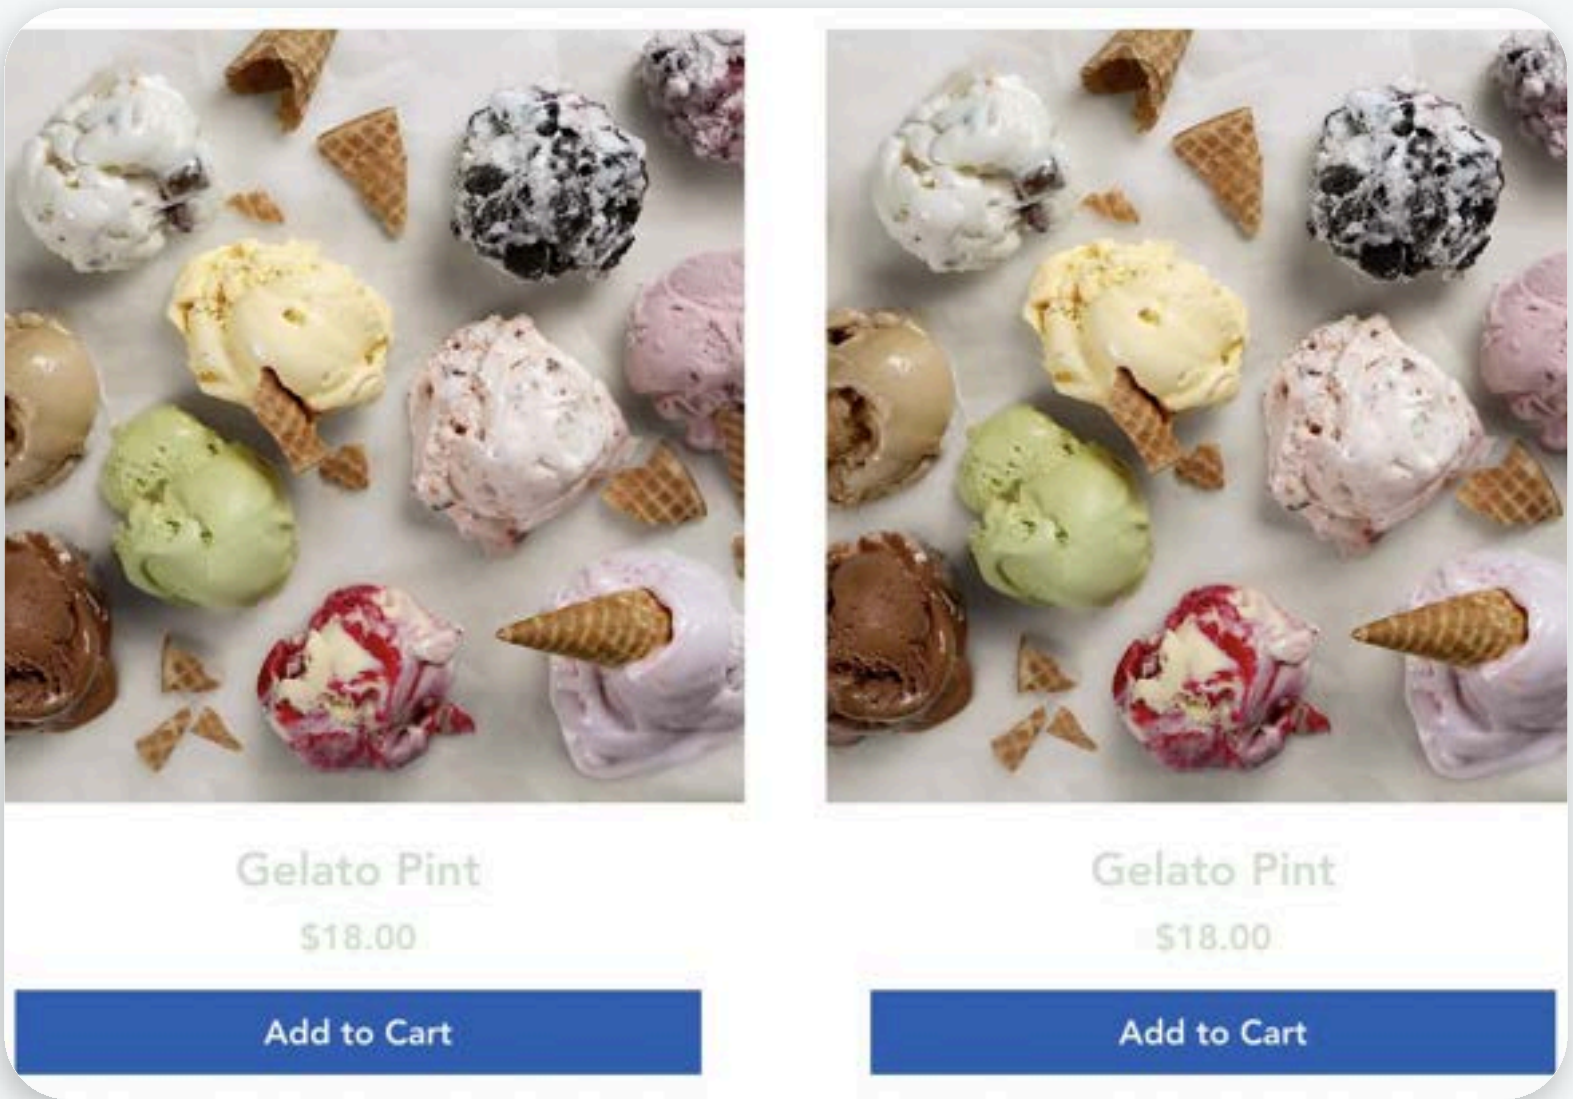

THE BIG PICTURE

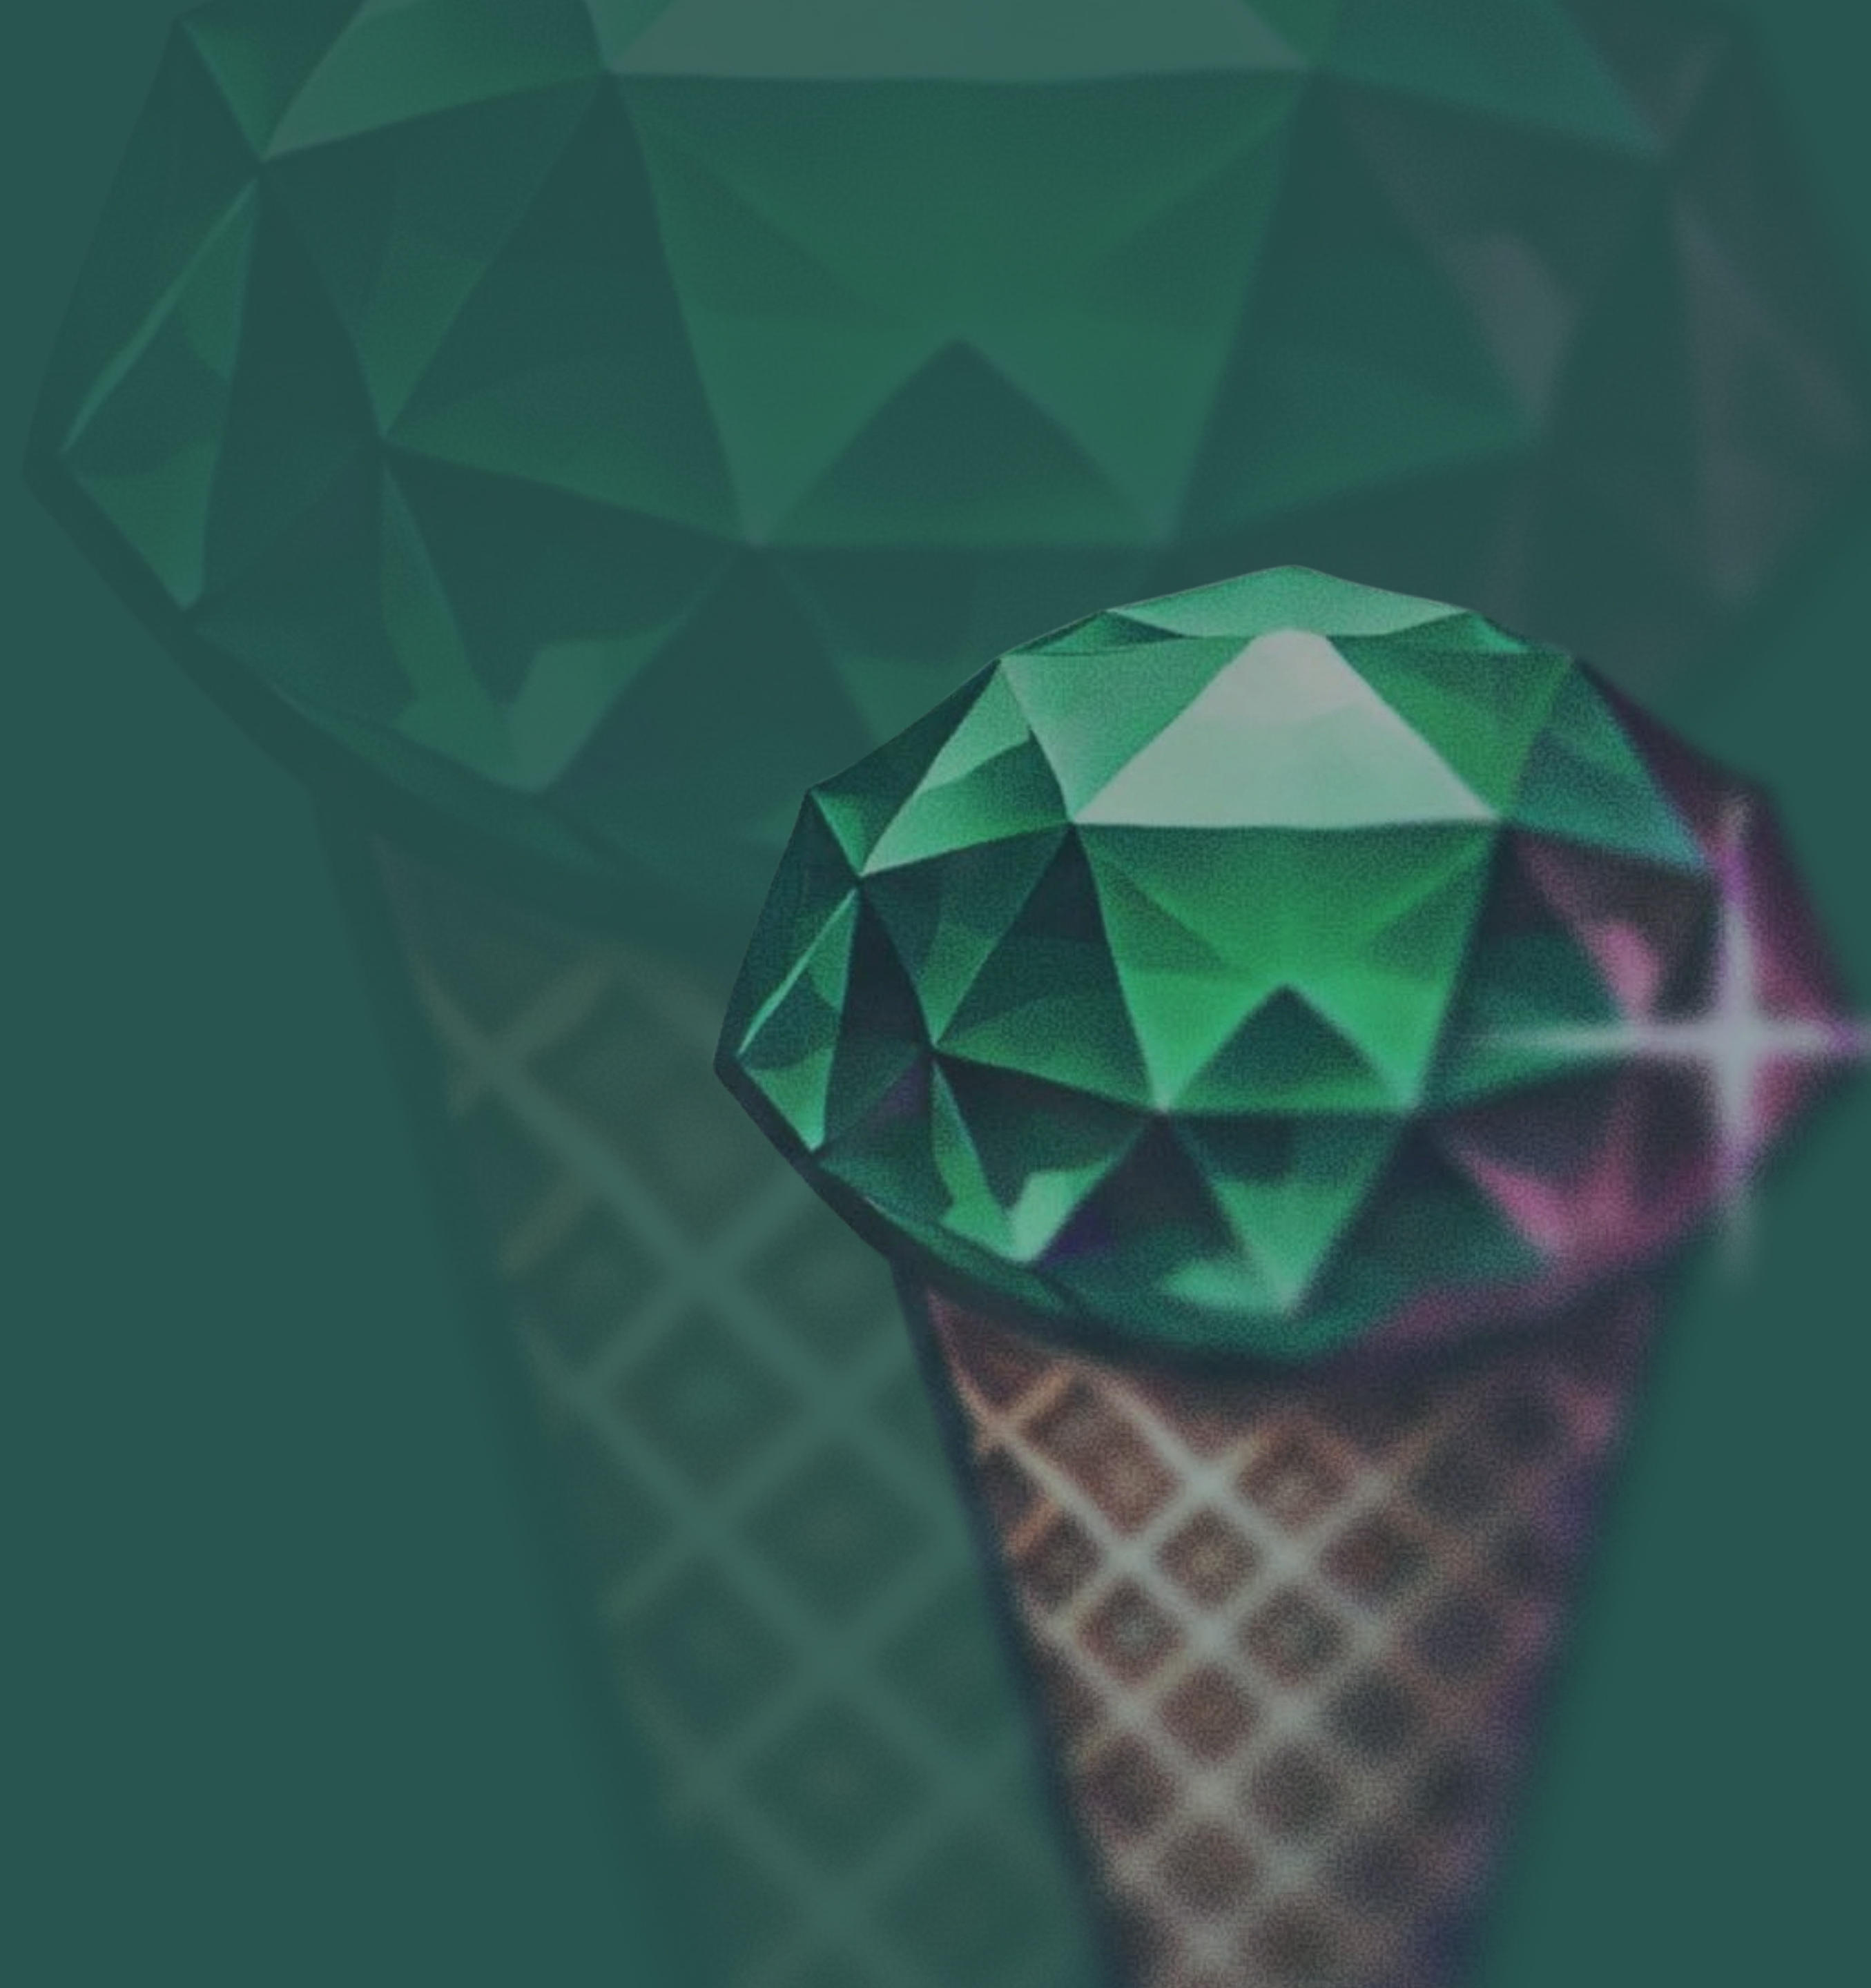

The Problem

What we initially noticed about the initial website:

- Did not match intended premium and aesthetic branding
- Pages lacked clarity, structure, and functionality
- Site navigation felt confusing as elements lacked consistency

Exploring the Problem

Defining the Problem

Initial Exploration

★

Students & local community in San Luis Obispo

- How do students and local community members in San Luis Obispo decide when and why to order ice cream online rather than in person?
- In what social and personal contexts is ice cream experienced as a treat or event versus a convenient food purchase, and how does that affect ordering behavior?
- How do people interpret the vibe, values, and trustworthiness of an ice cream shop through its website, and how does that perception influence their decision to order?

★

Health-Conscious people in San Luis Obispo

- How do health-conscious people search for and decide on a sweet treat, and what role do ingredients, dietary fit, and flavor profiles play in that process?
- In what contexts do health-conscious people choose to get ice cream from a store, and what motivates them to do so instead of making or buying alternatives?
- How do health-conscious people interpret a dessert brand's values, ingredient ethics, and health positioning through its website, and how does that perception influence trust and ordering decisions?

Initial research → Interviews, data collection, user personas → gave us insight into what our customers need!

Section 1	Data Summary	Data	Need Statement
Online:	knows what flavor	get ideas from food & social media posts see reviews & photos from friends	when ordering online, people need to have already tried the flavor
long line,	doesn't have fav flavors	get the flavor they want ask for favs from friends pick a new flavor	ice cream buyers need to optimize their time
work settings		be quick eat with friends eat with family	- ice cream buyers need to be in an environment that enables focus - ice cream buyers need to have their work materials working
social		ice cream shop setting ice cream shop setting ice cream shop setting	ice cream buyers need to spend time with friends and family
brand		brand identity brand identity brand identity	ice cream buyers need to know that a brand aligns with their values as well as sells quality products
price		price price price	ice cream buyers need to be able to budget their spending
accessibility/important info		accessibility/important info accessibility/important info accessibility/important info	ice cream buyers need sufficient information to have the confidence that they will get good ice cream
flavors		flavors flavors flavors	ice cream buyers need to be informed on the flavors they are buying
ingredients		ingredients ingredients ingredients	- ice cream buyers need to have the confidence that they will not get sick eating ice cream - ice cream buyers need to avoid feeling guilt about the ice cream they eat

Our Users' Pain Points

Difficulty quickly understanding flavors

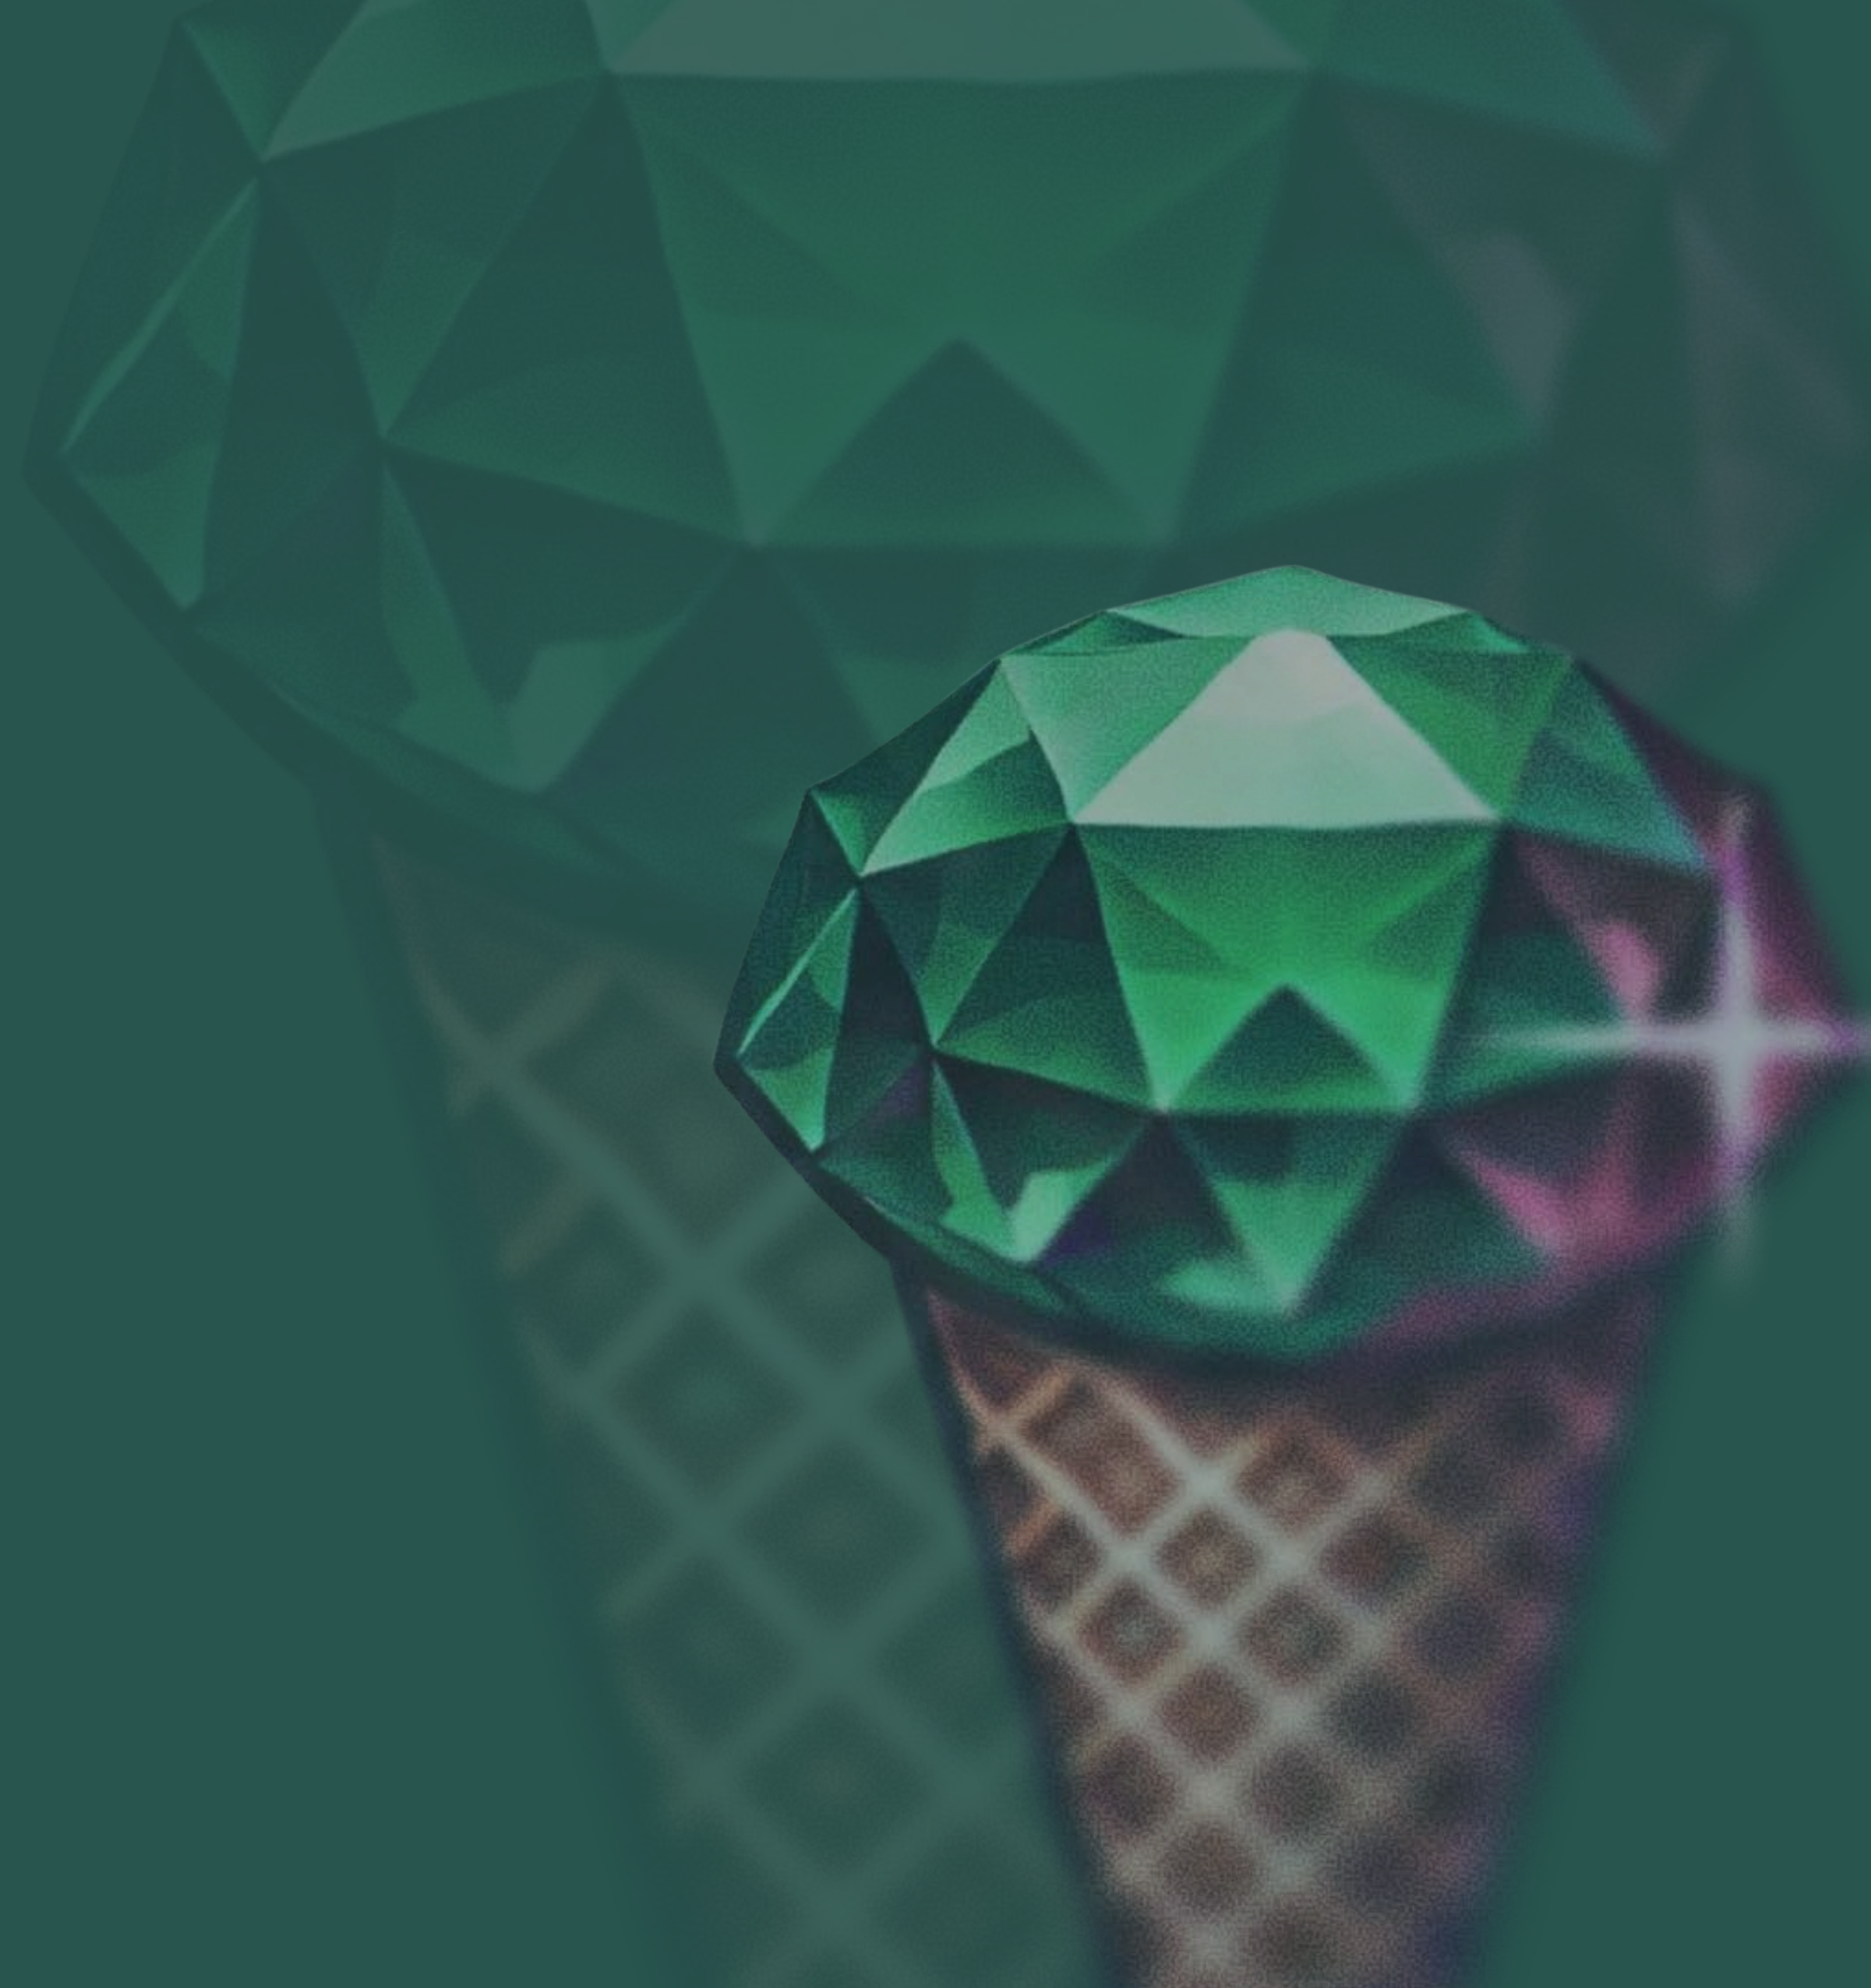

Dietary/health-related needs must be met

Difficulty navigating sites when pages are unclear

Translating Insights Into Direction

HMWs

How might we make new flavors appealing and fun to explore?

How might we reduce hesitation and help customers feel confident choosing a flavor?

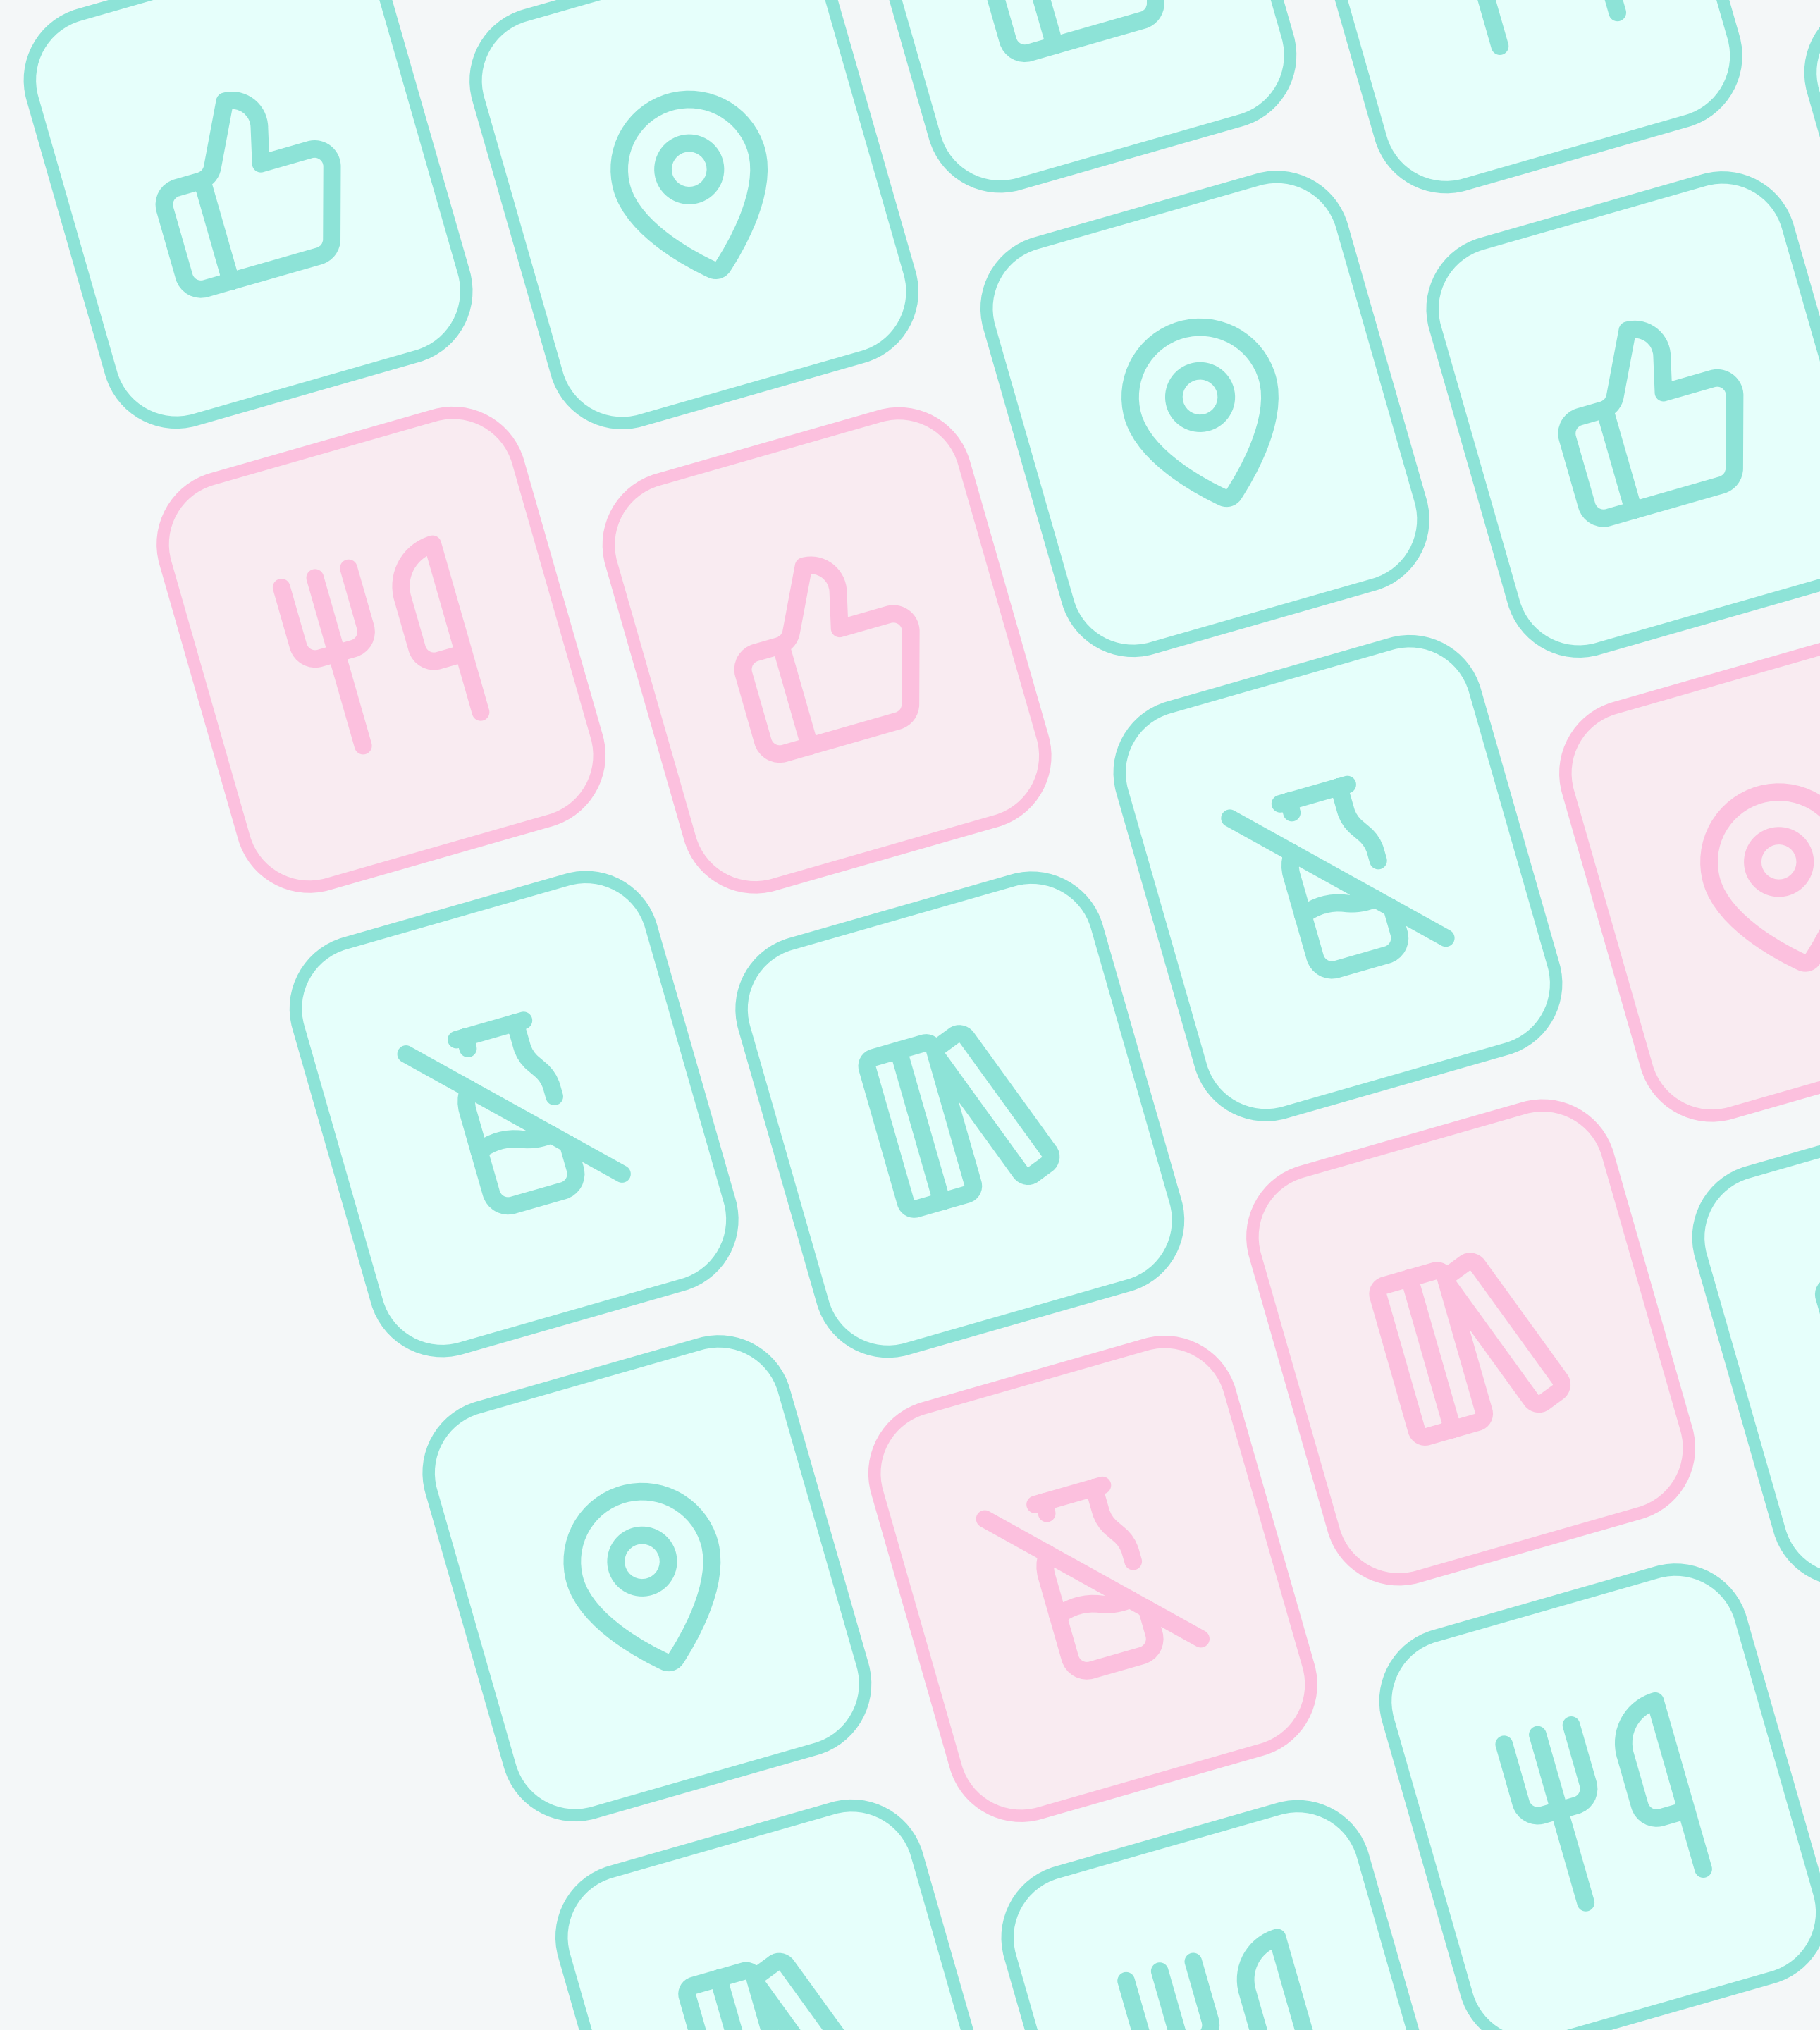

How might we make ingredients, allergens, and pricing clear and instantly accessible?

How might we make finding the shop location efficient?

Defining Tasks

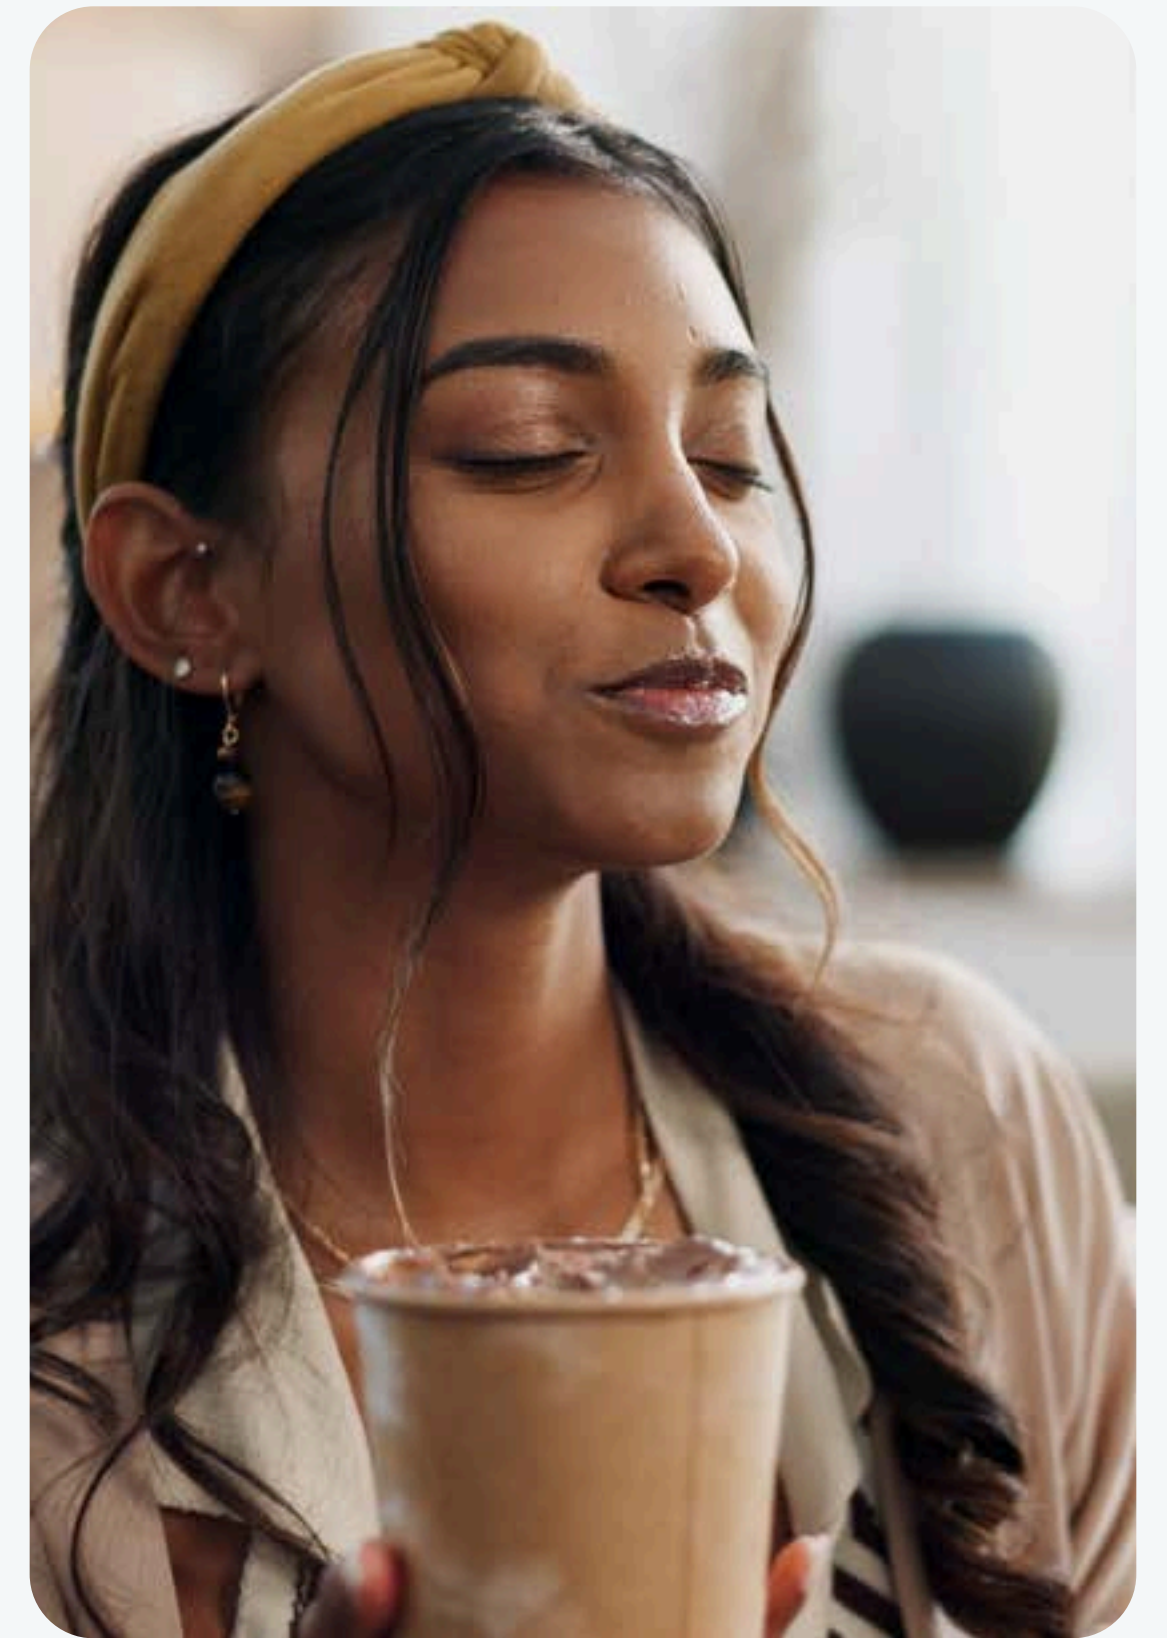

- Explore flavors and discover something appealing
- Find a flavor with confidence
- Make an informed gelato choice that fits your needs
- Learn Gemlato's story and values
- Plan an in-store visit

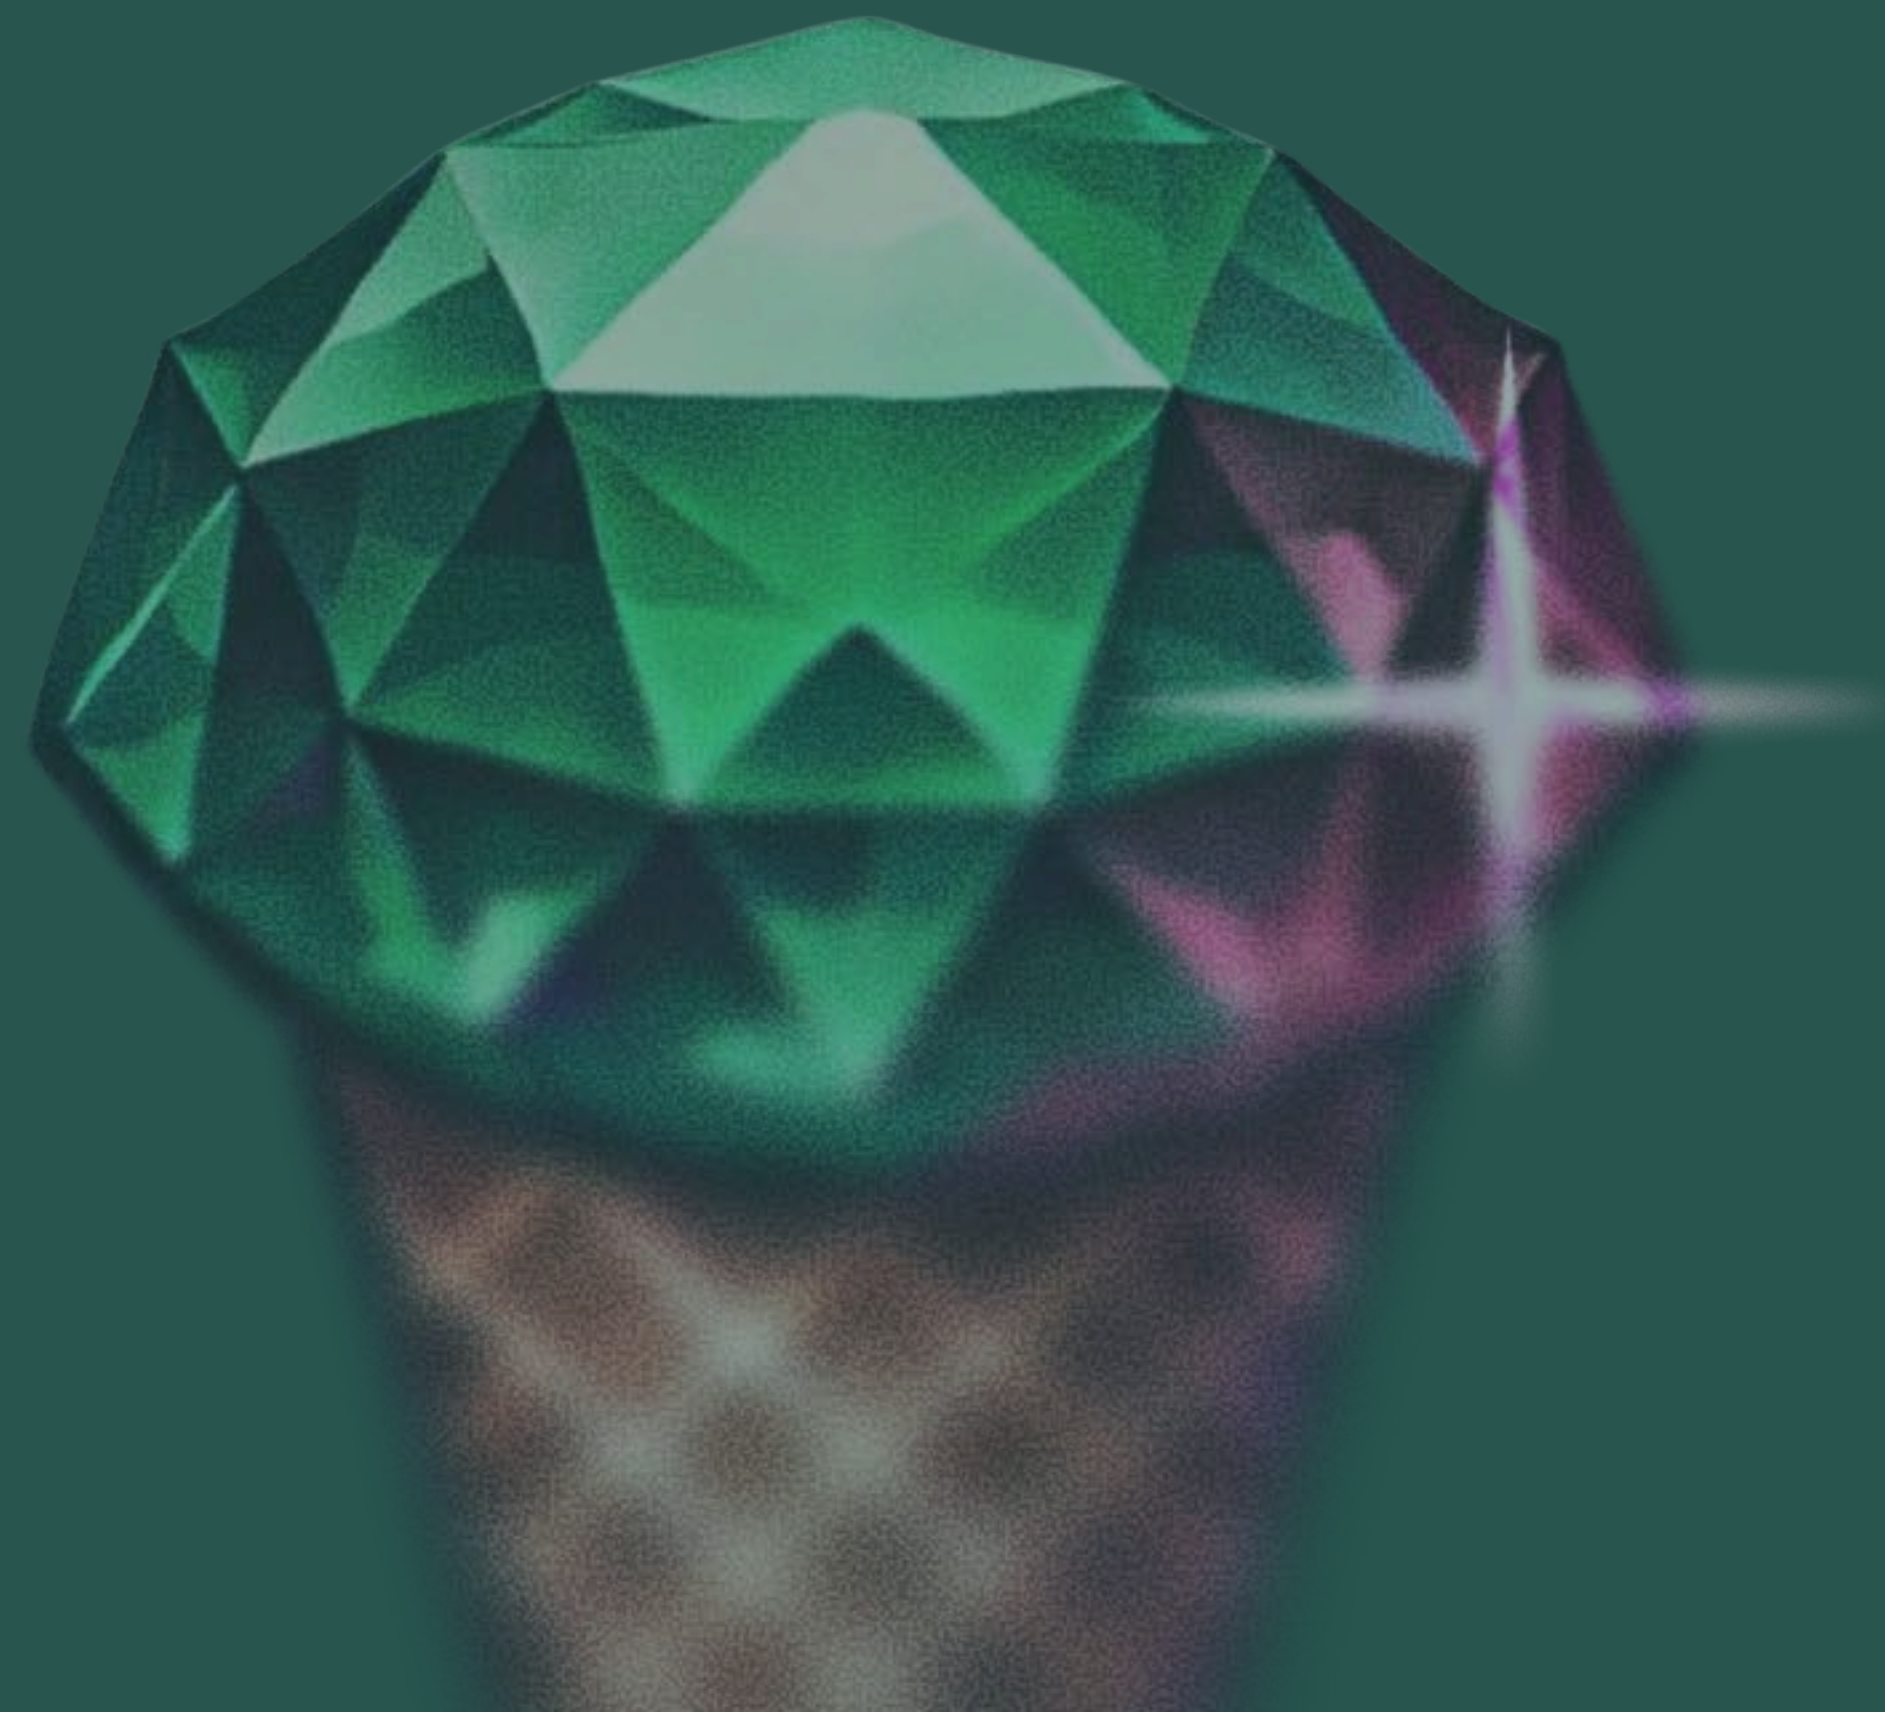

Why This Matters

Tasks map back to our personas' behaviors

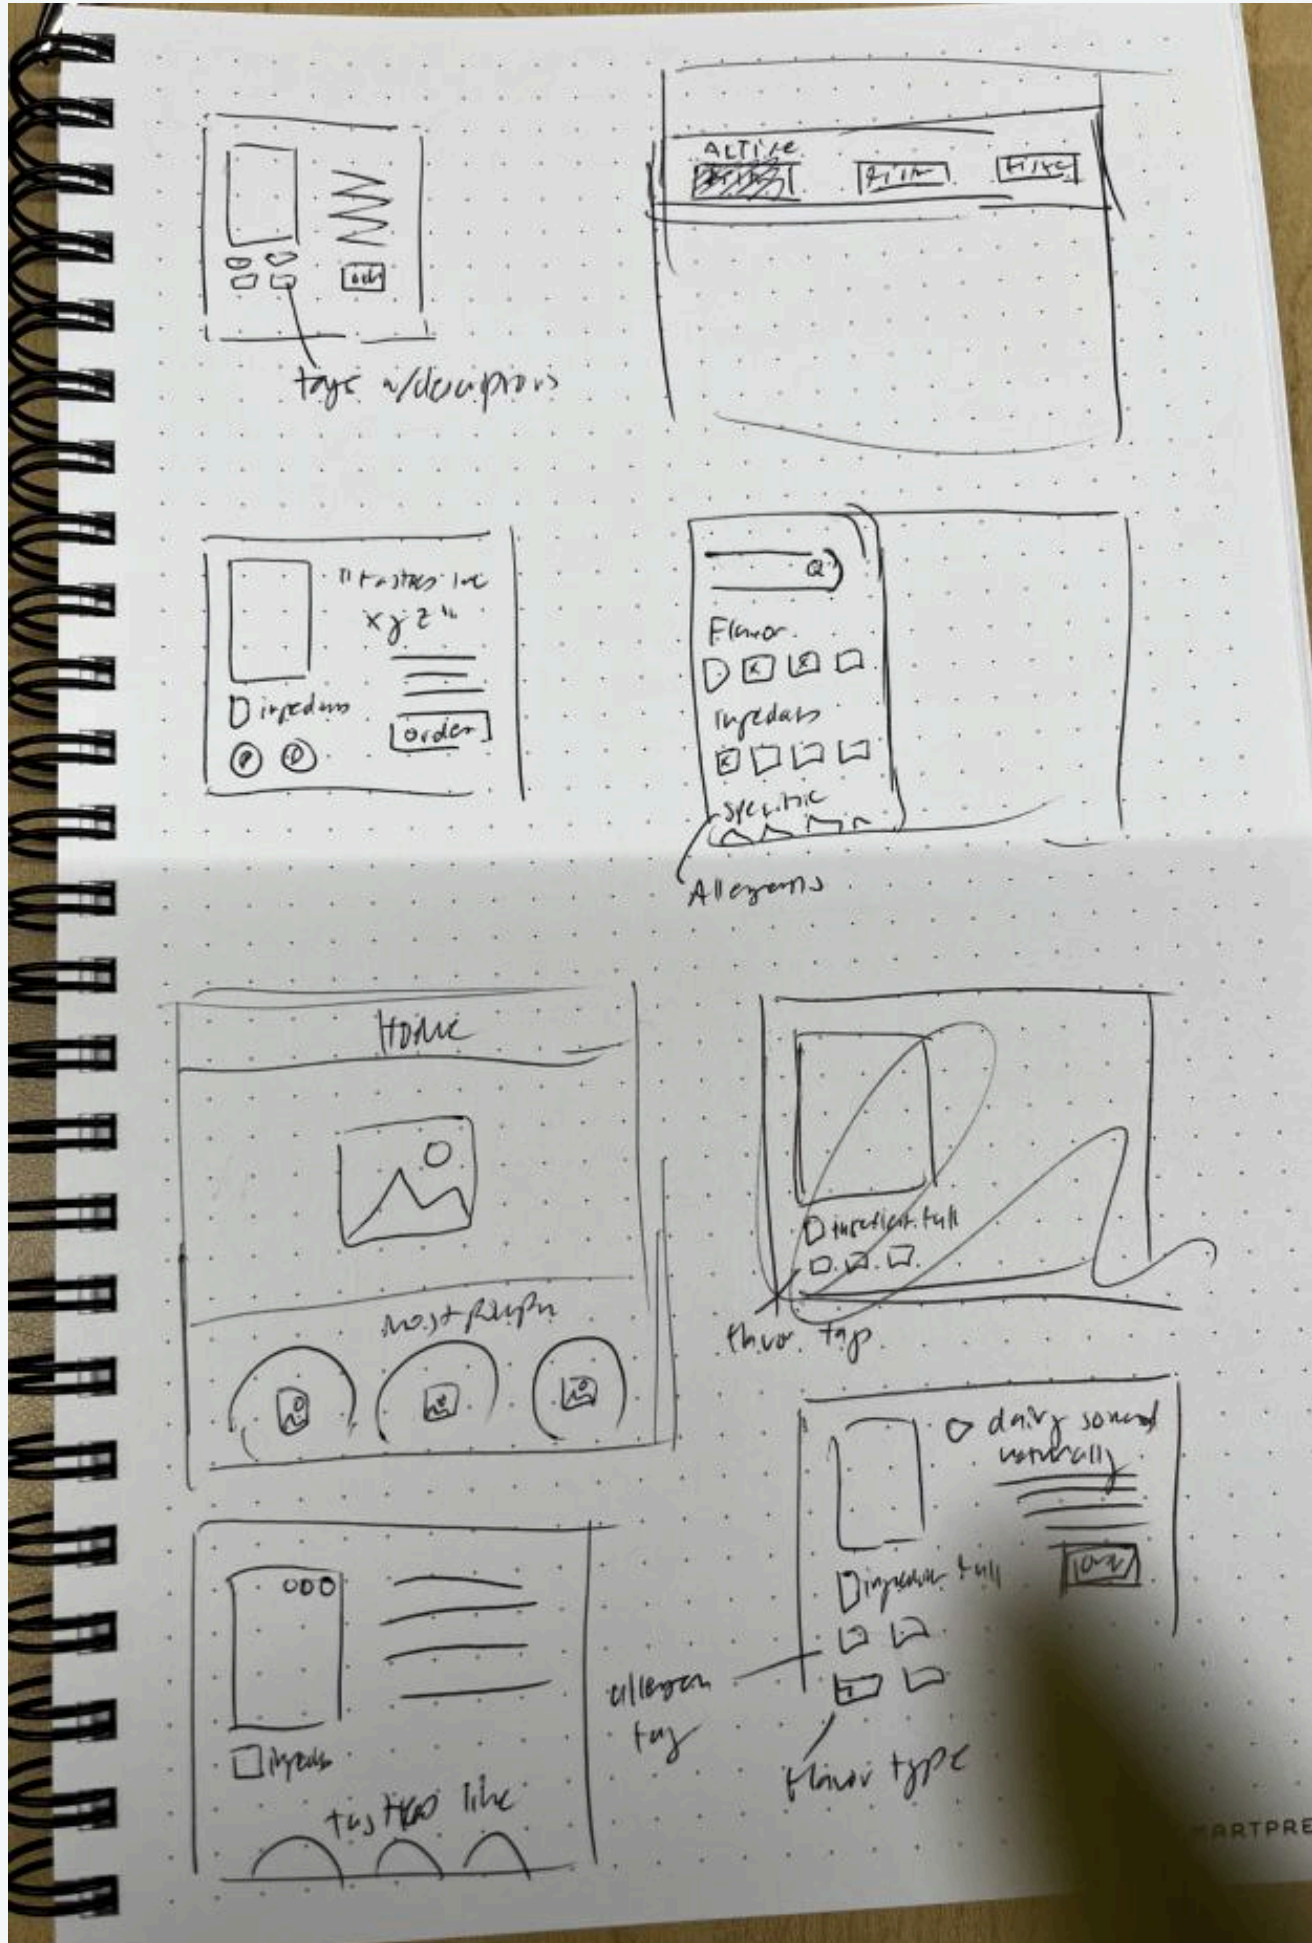

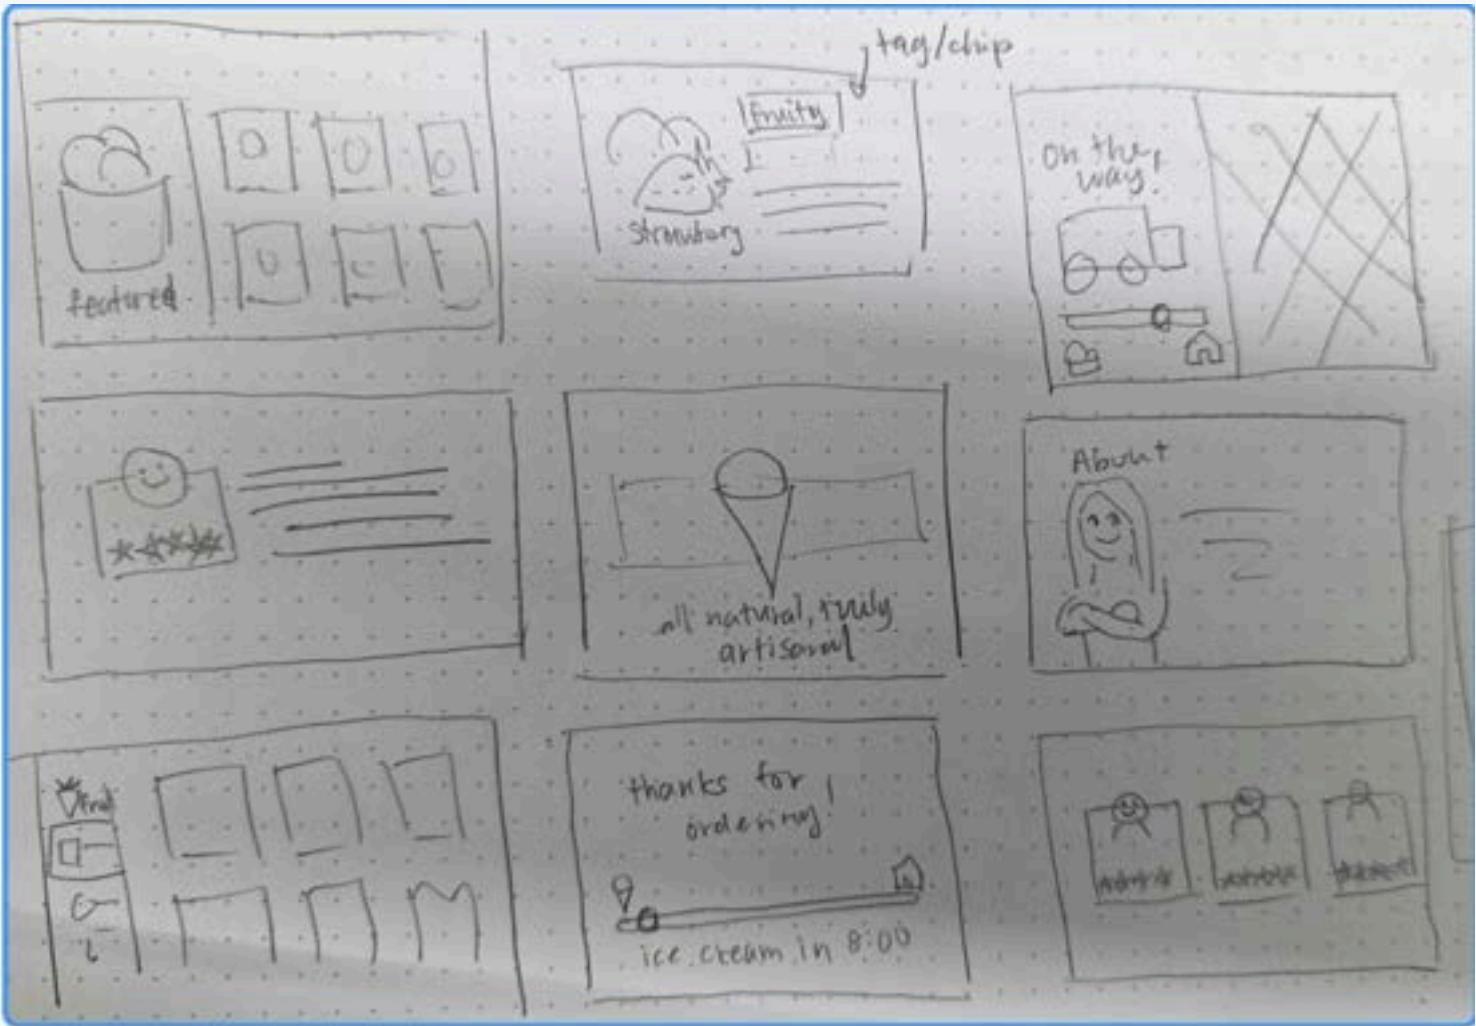

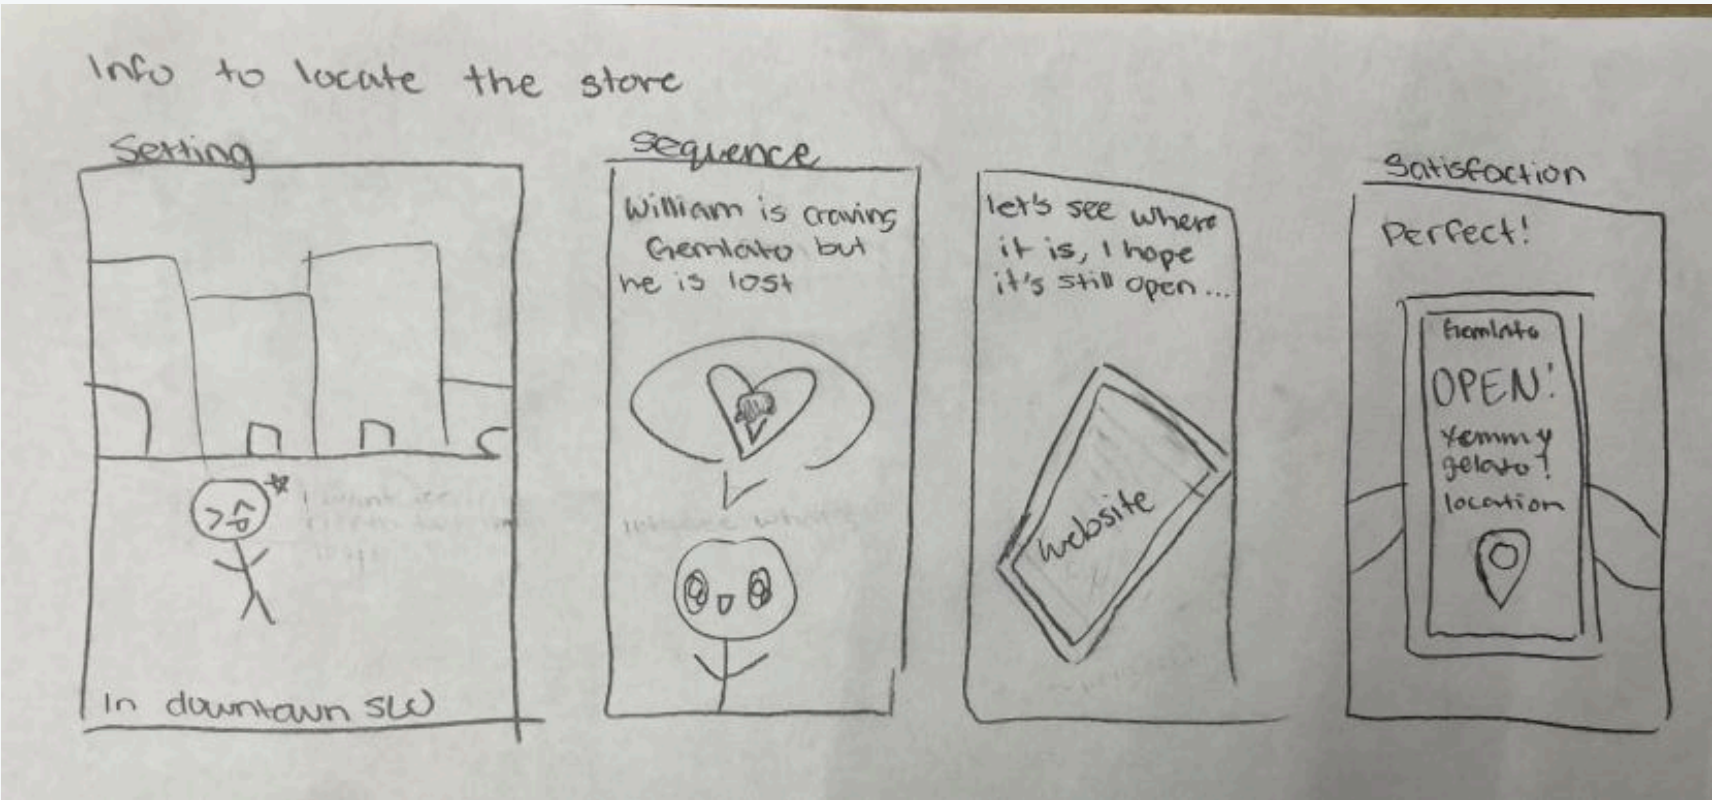

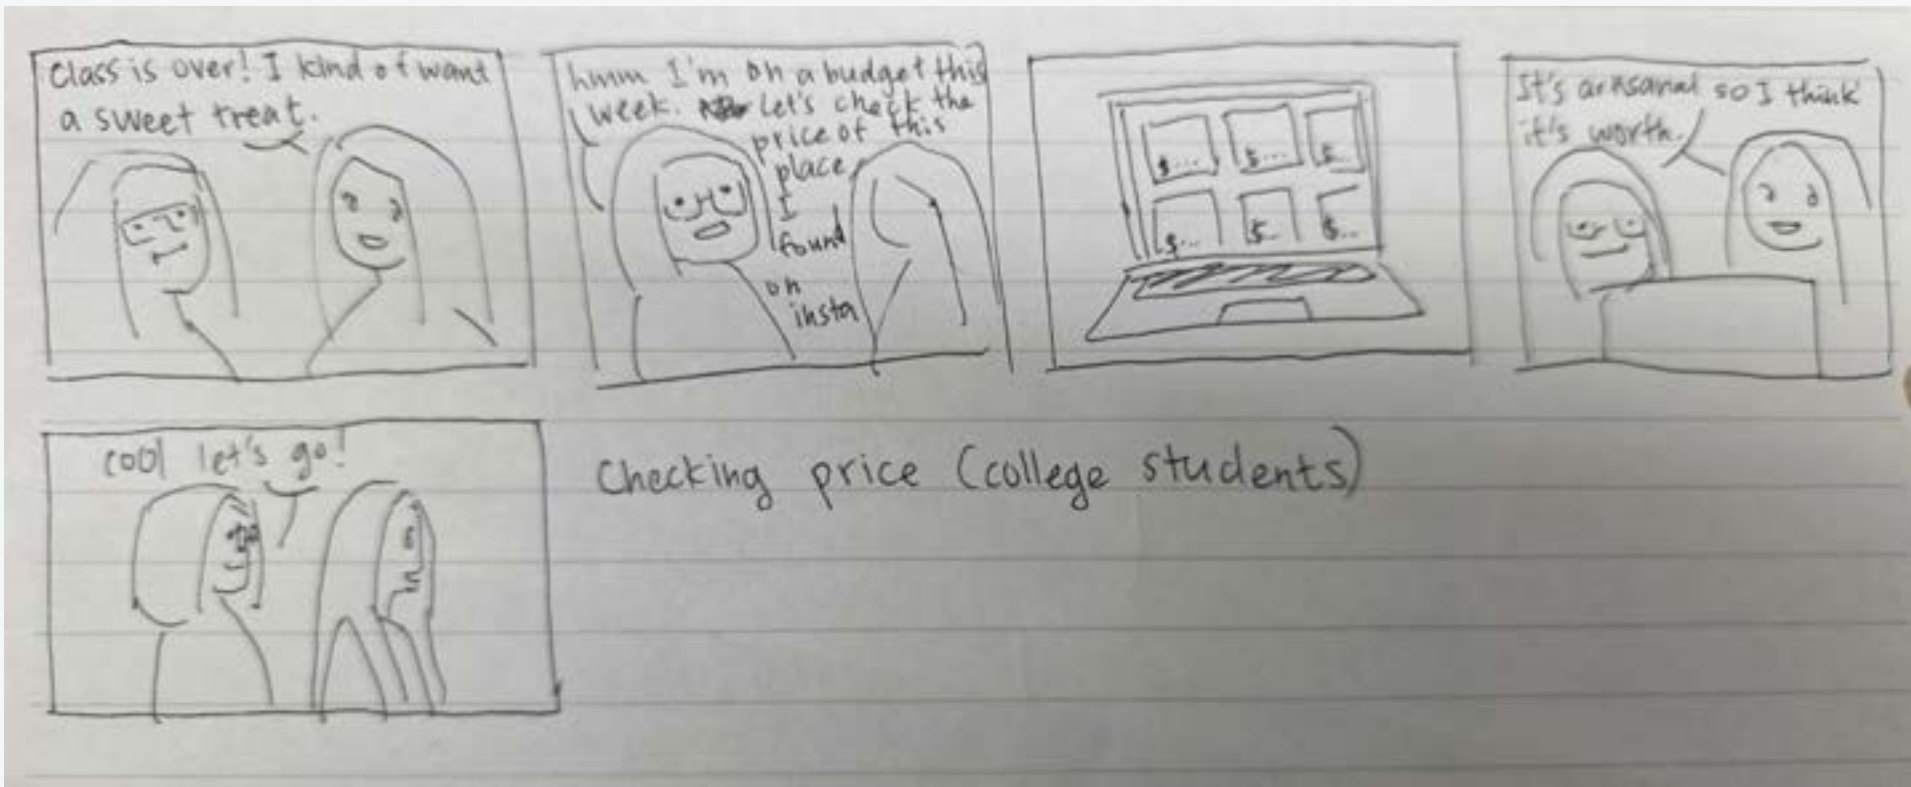

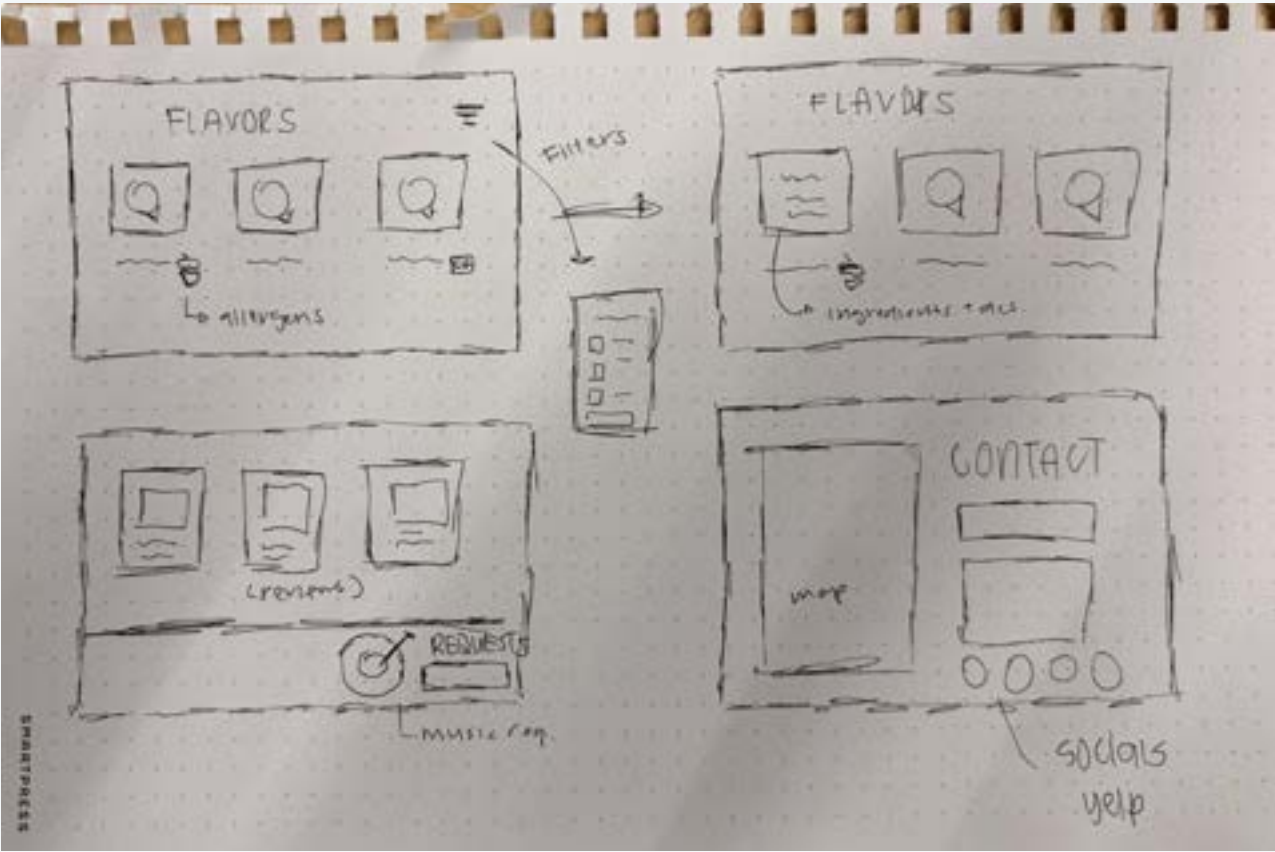

- Checking price, allergens, & ingredients
- Rely on other's input (reviews, popular flavors)
- Value overall experience

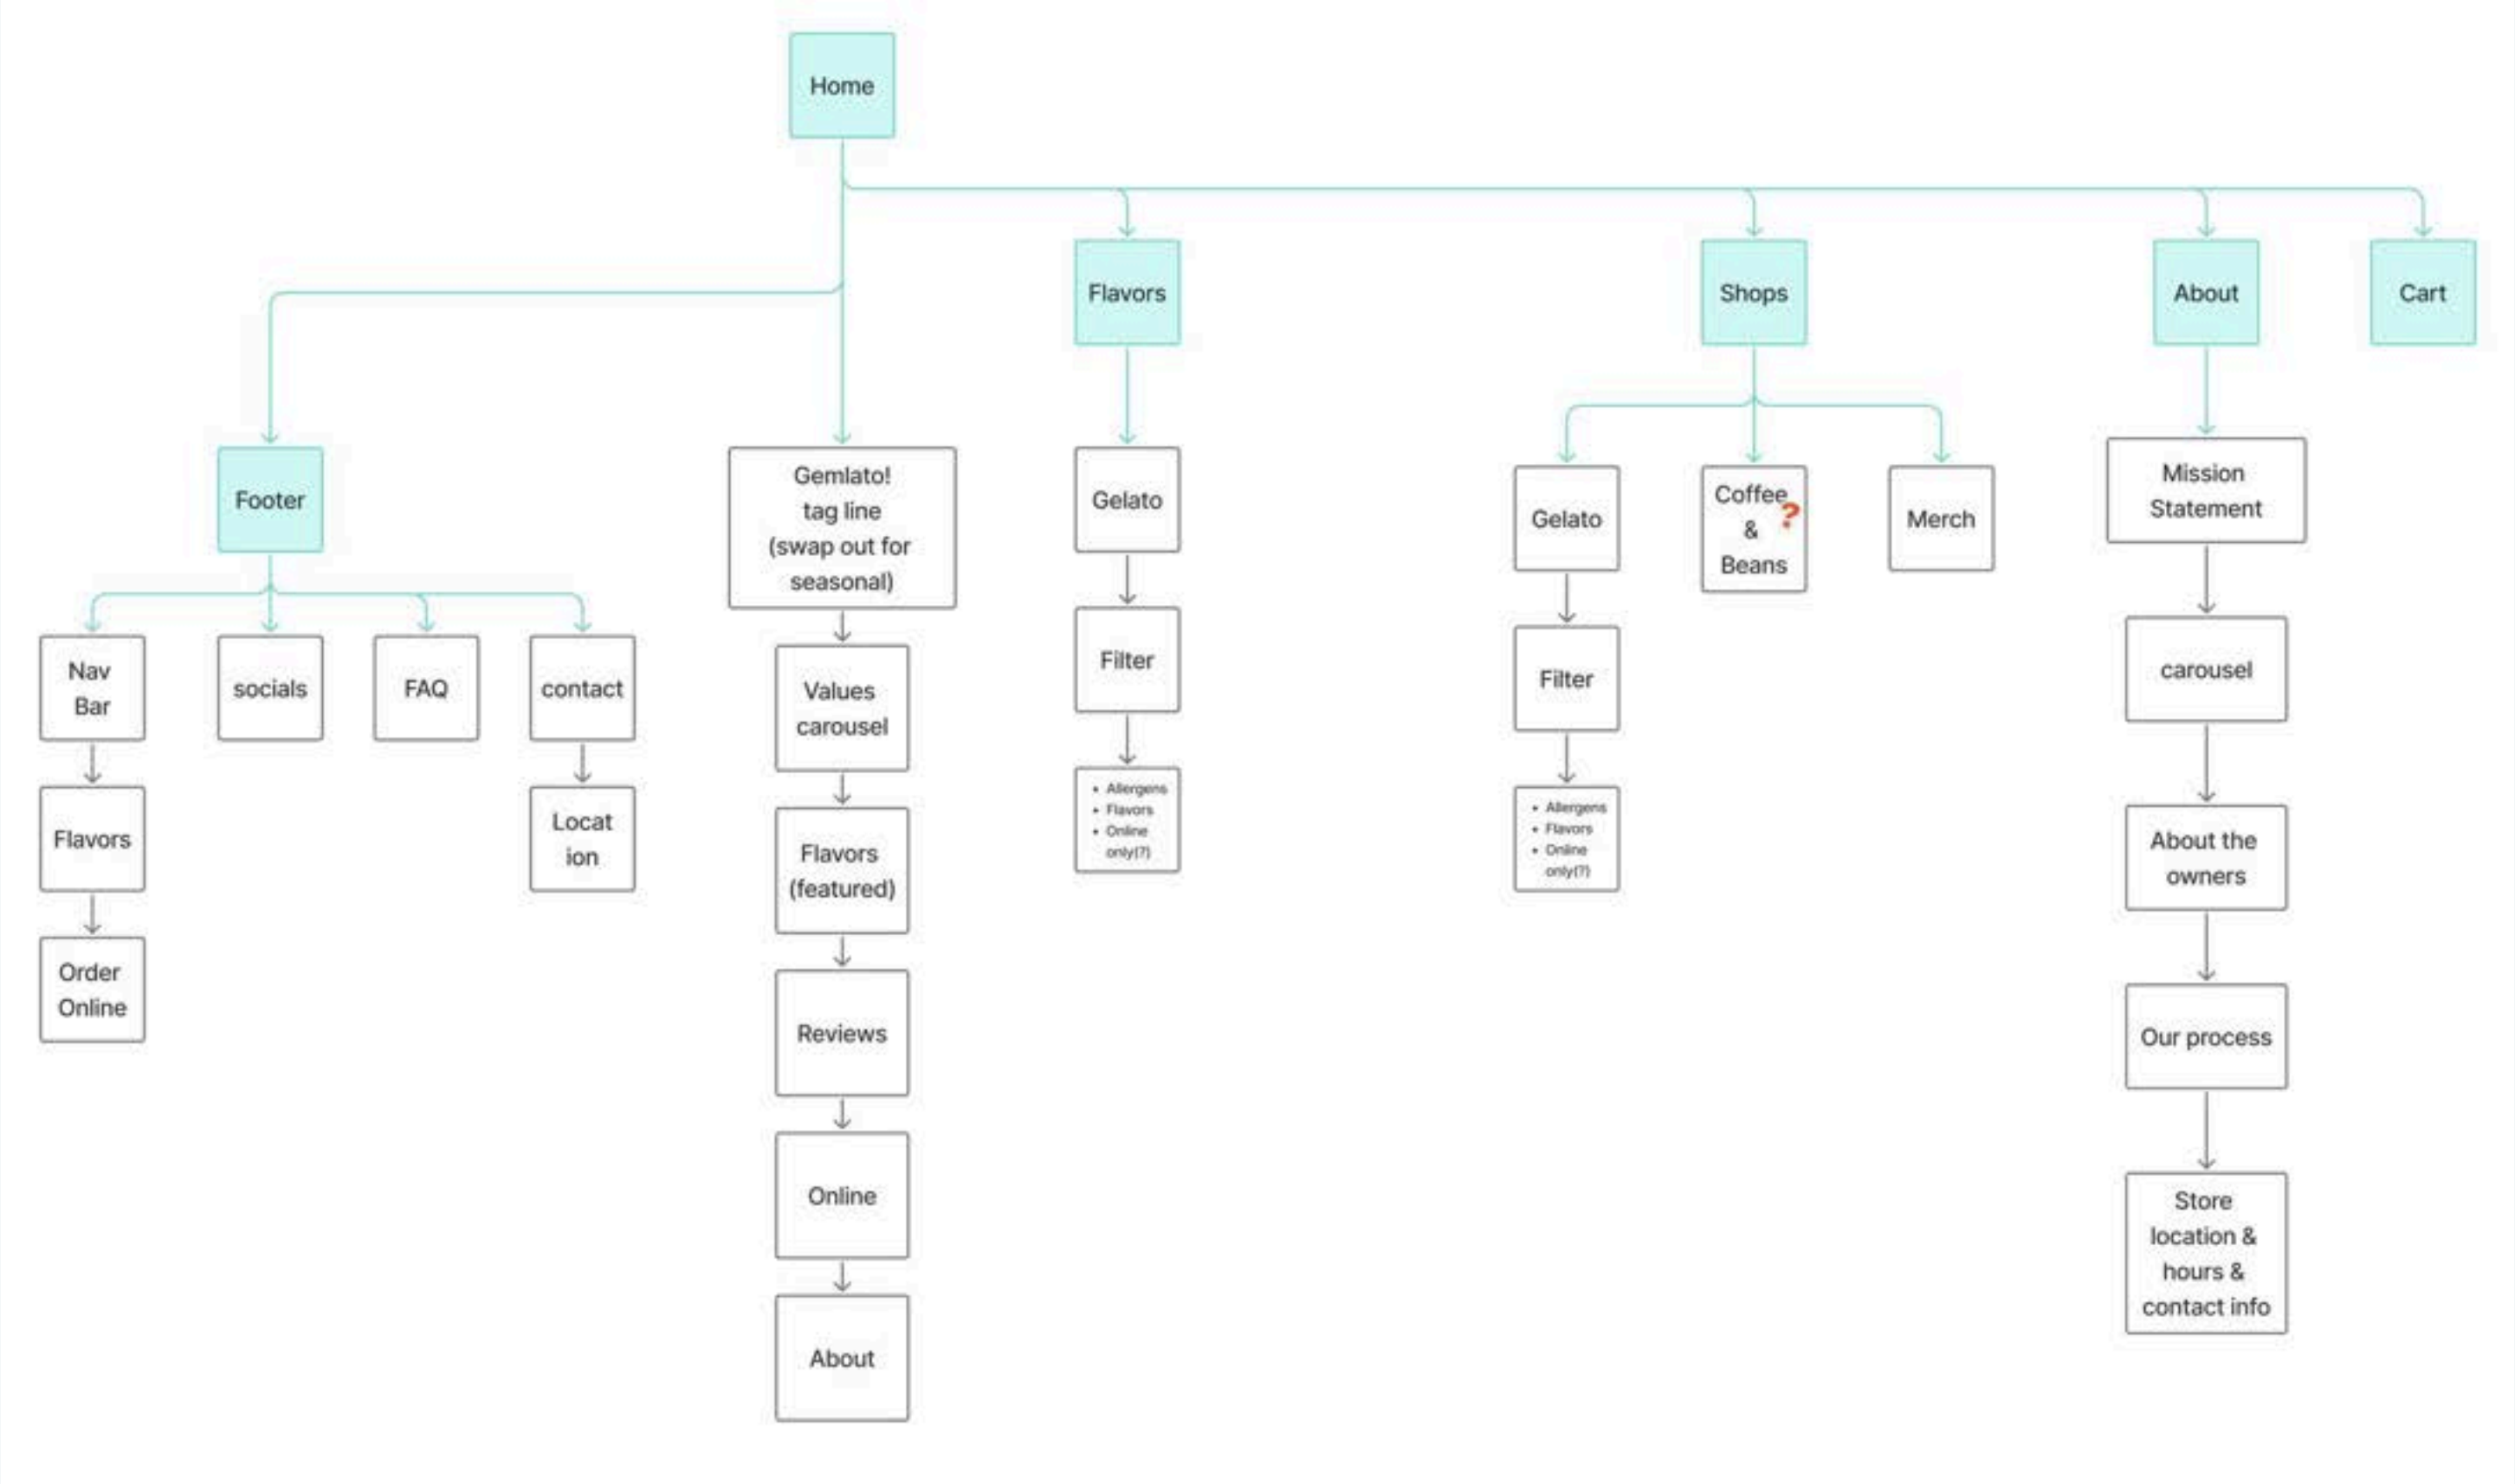

Design Evolution

Crazy 8s, Sketches, Storyboarding

Information Architecture

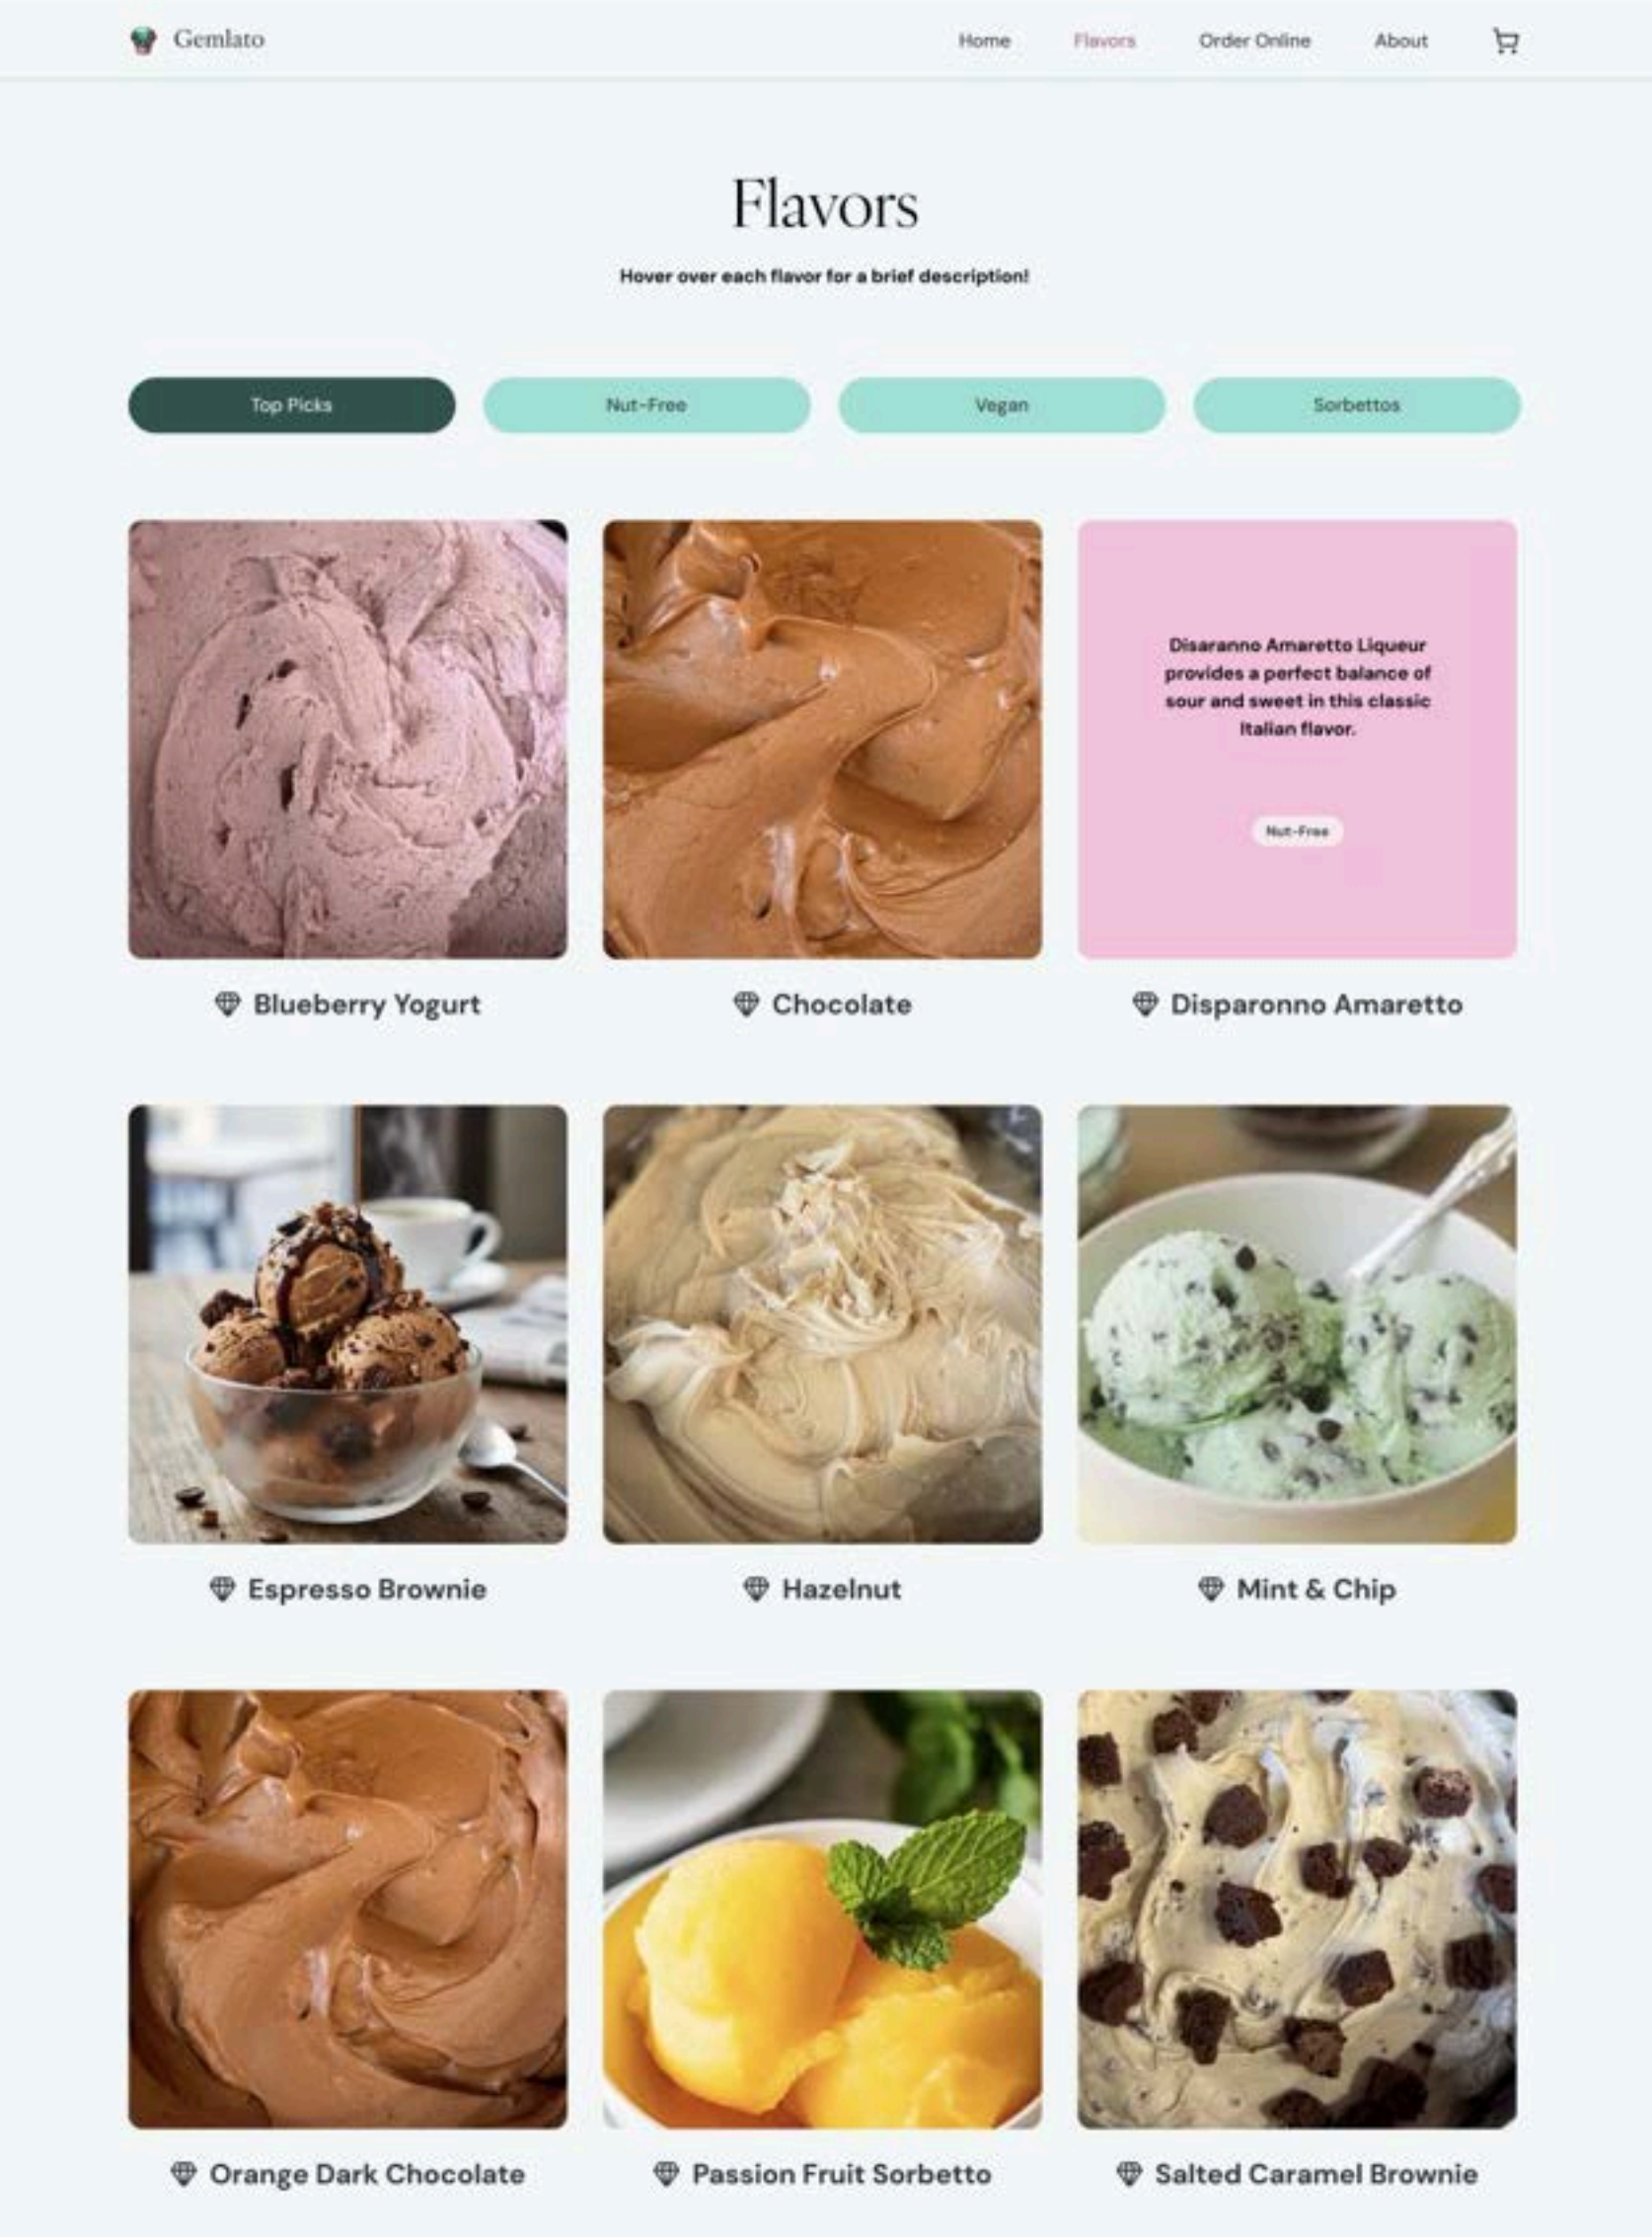

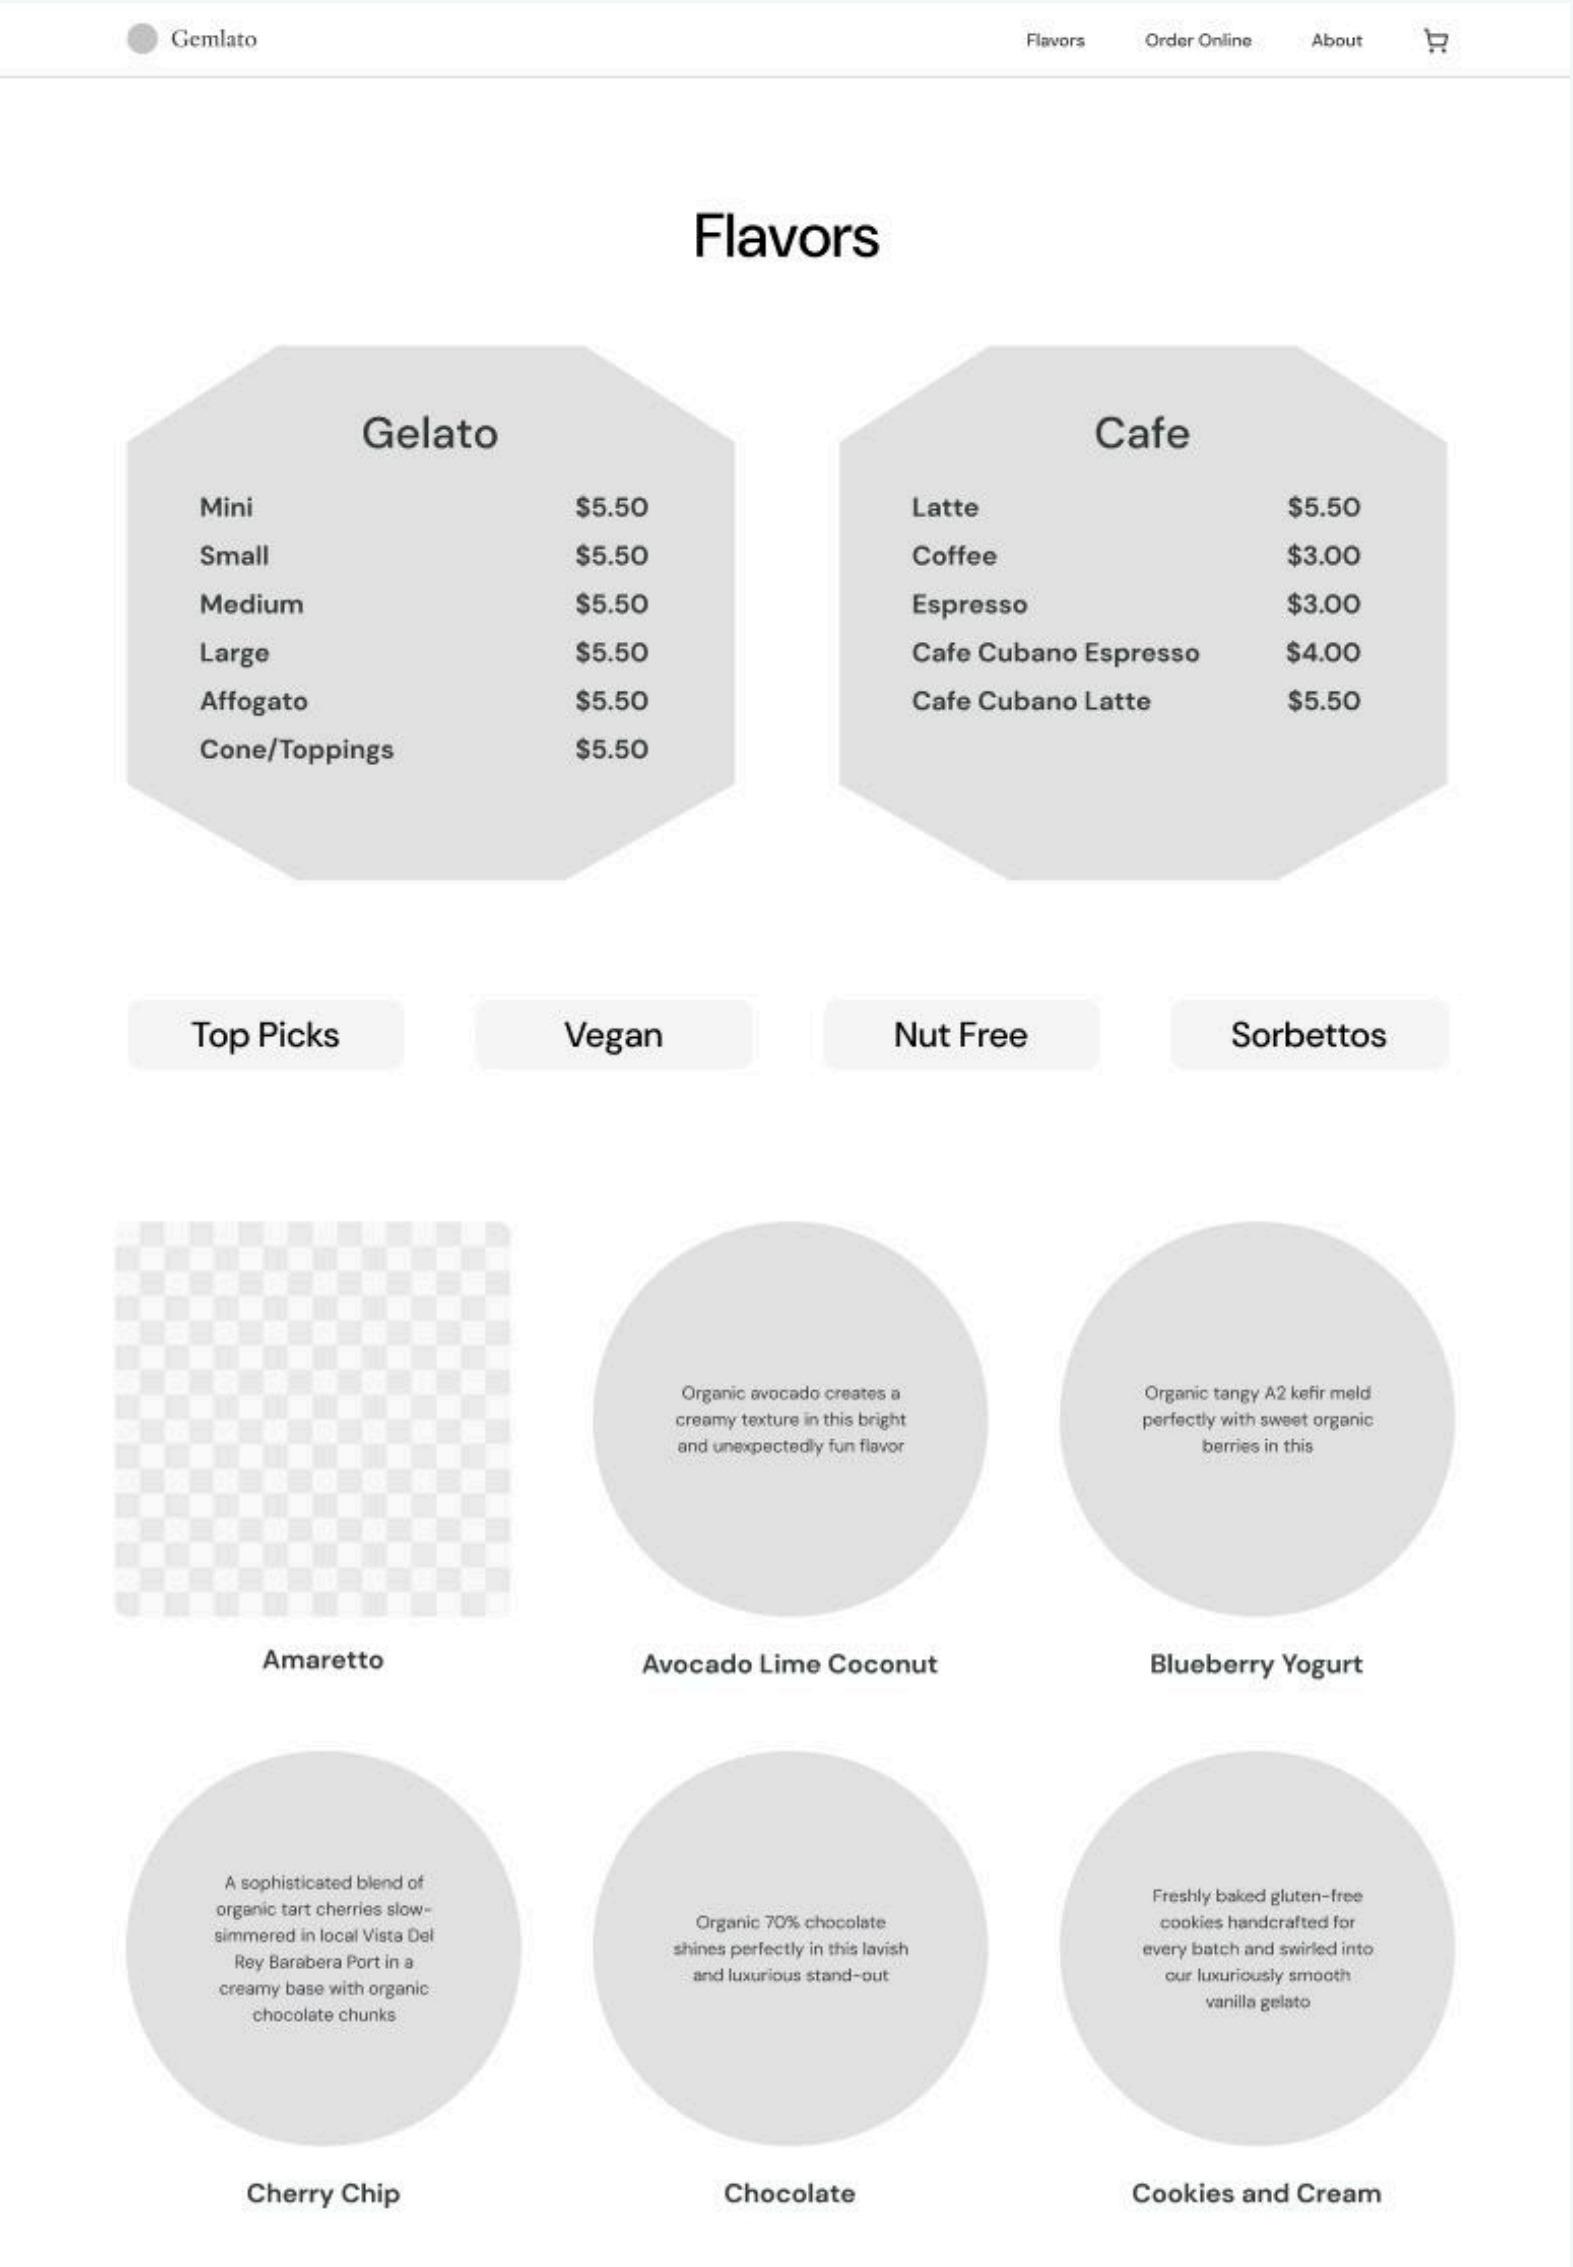

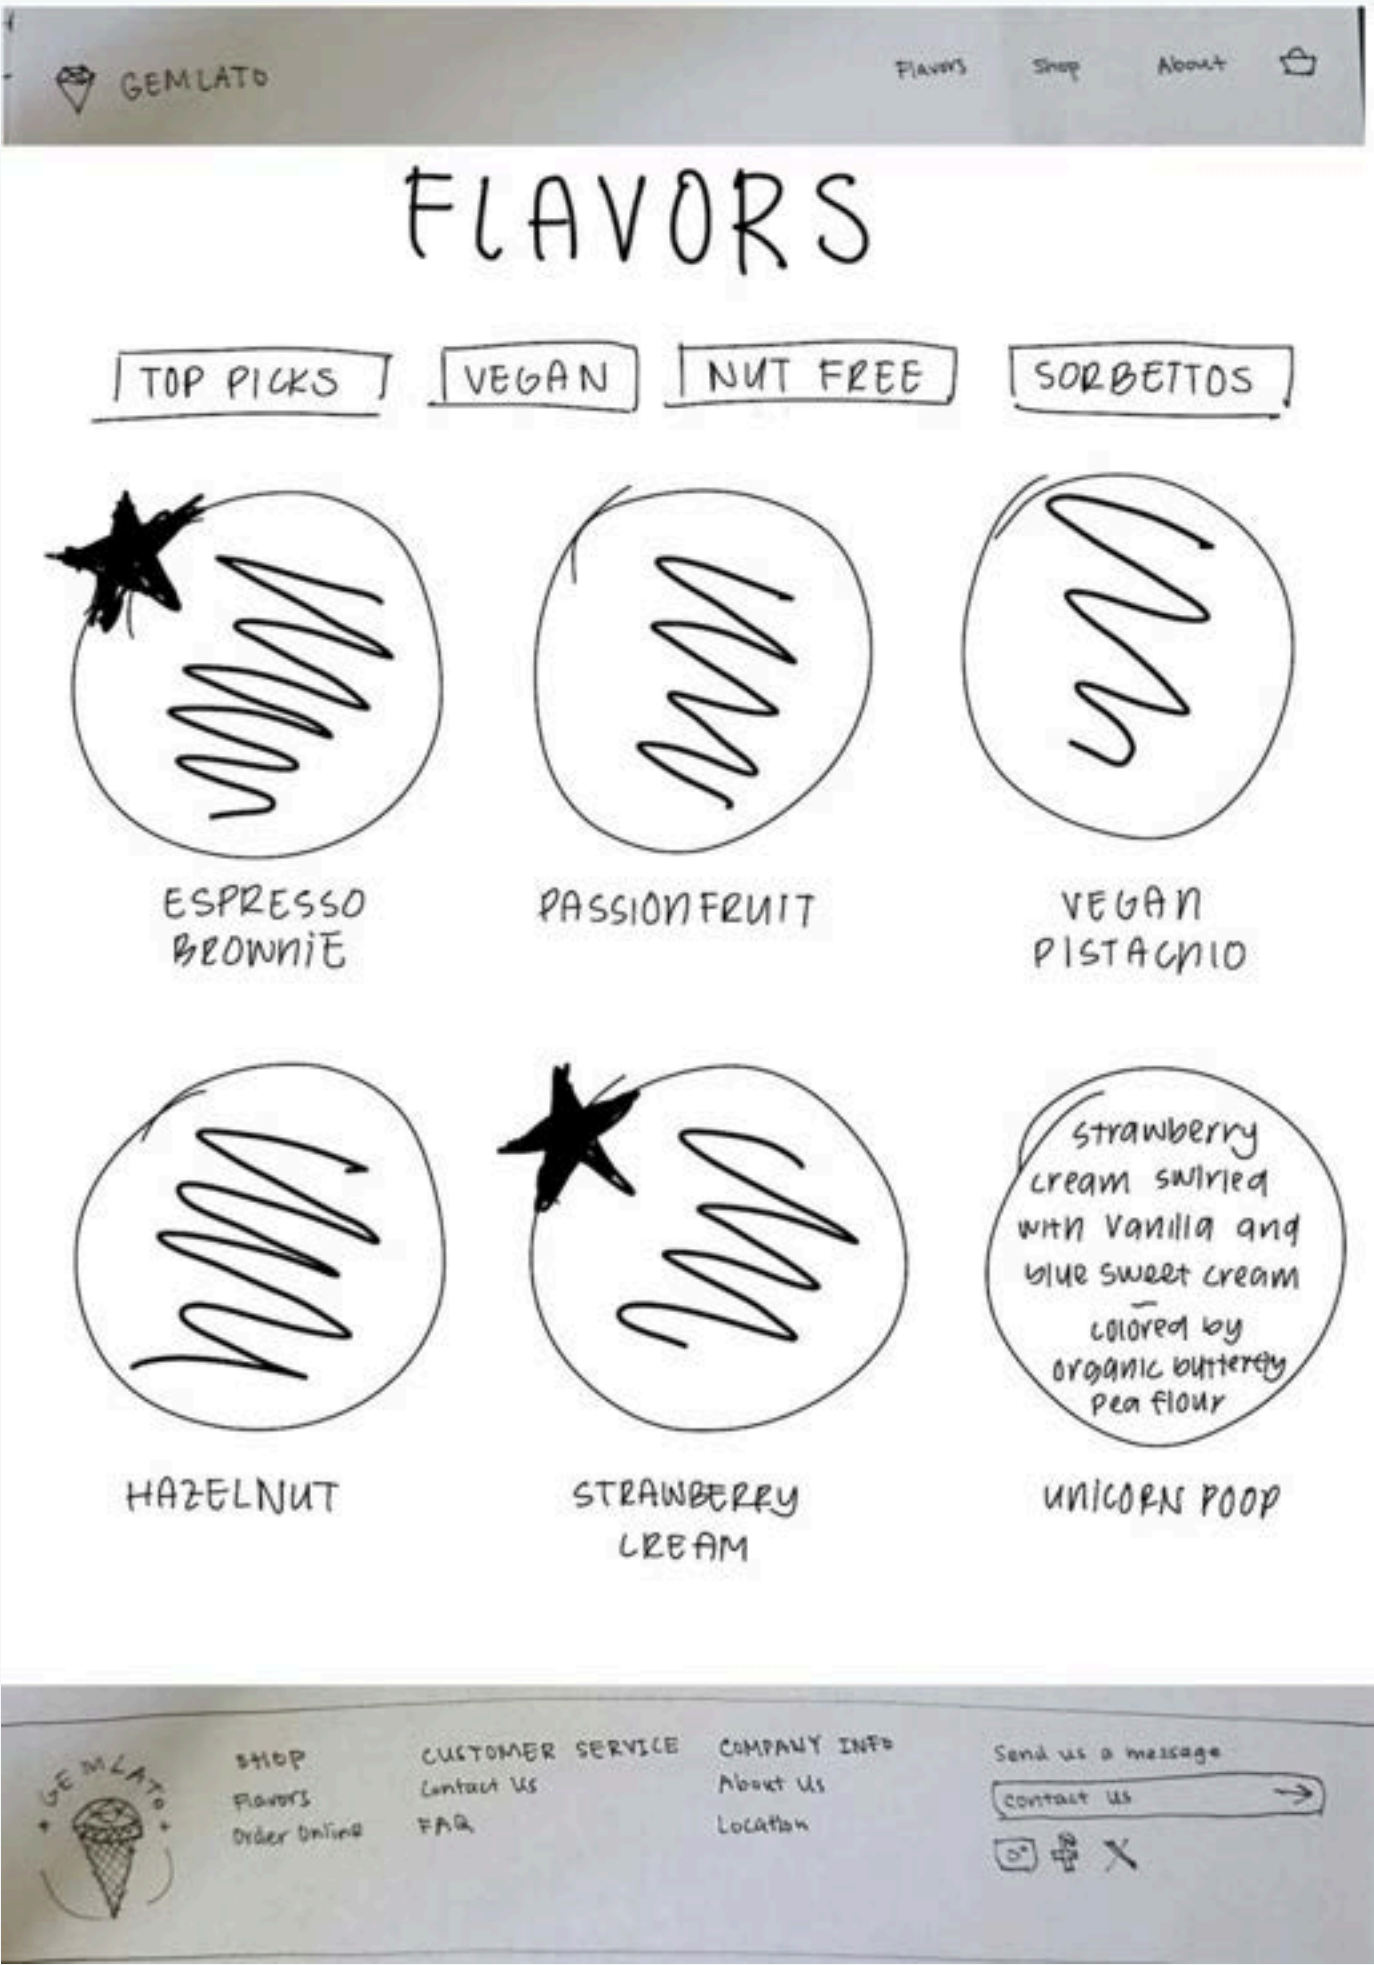

Goals of Our IA

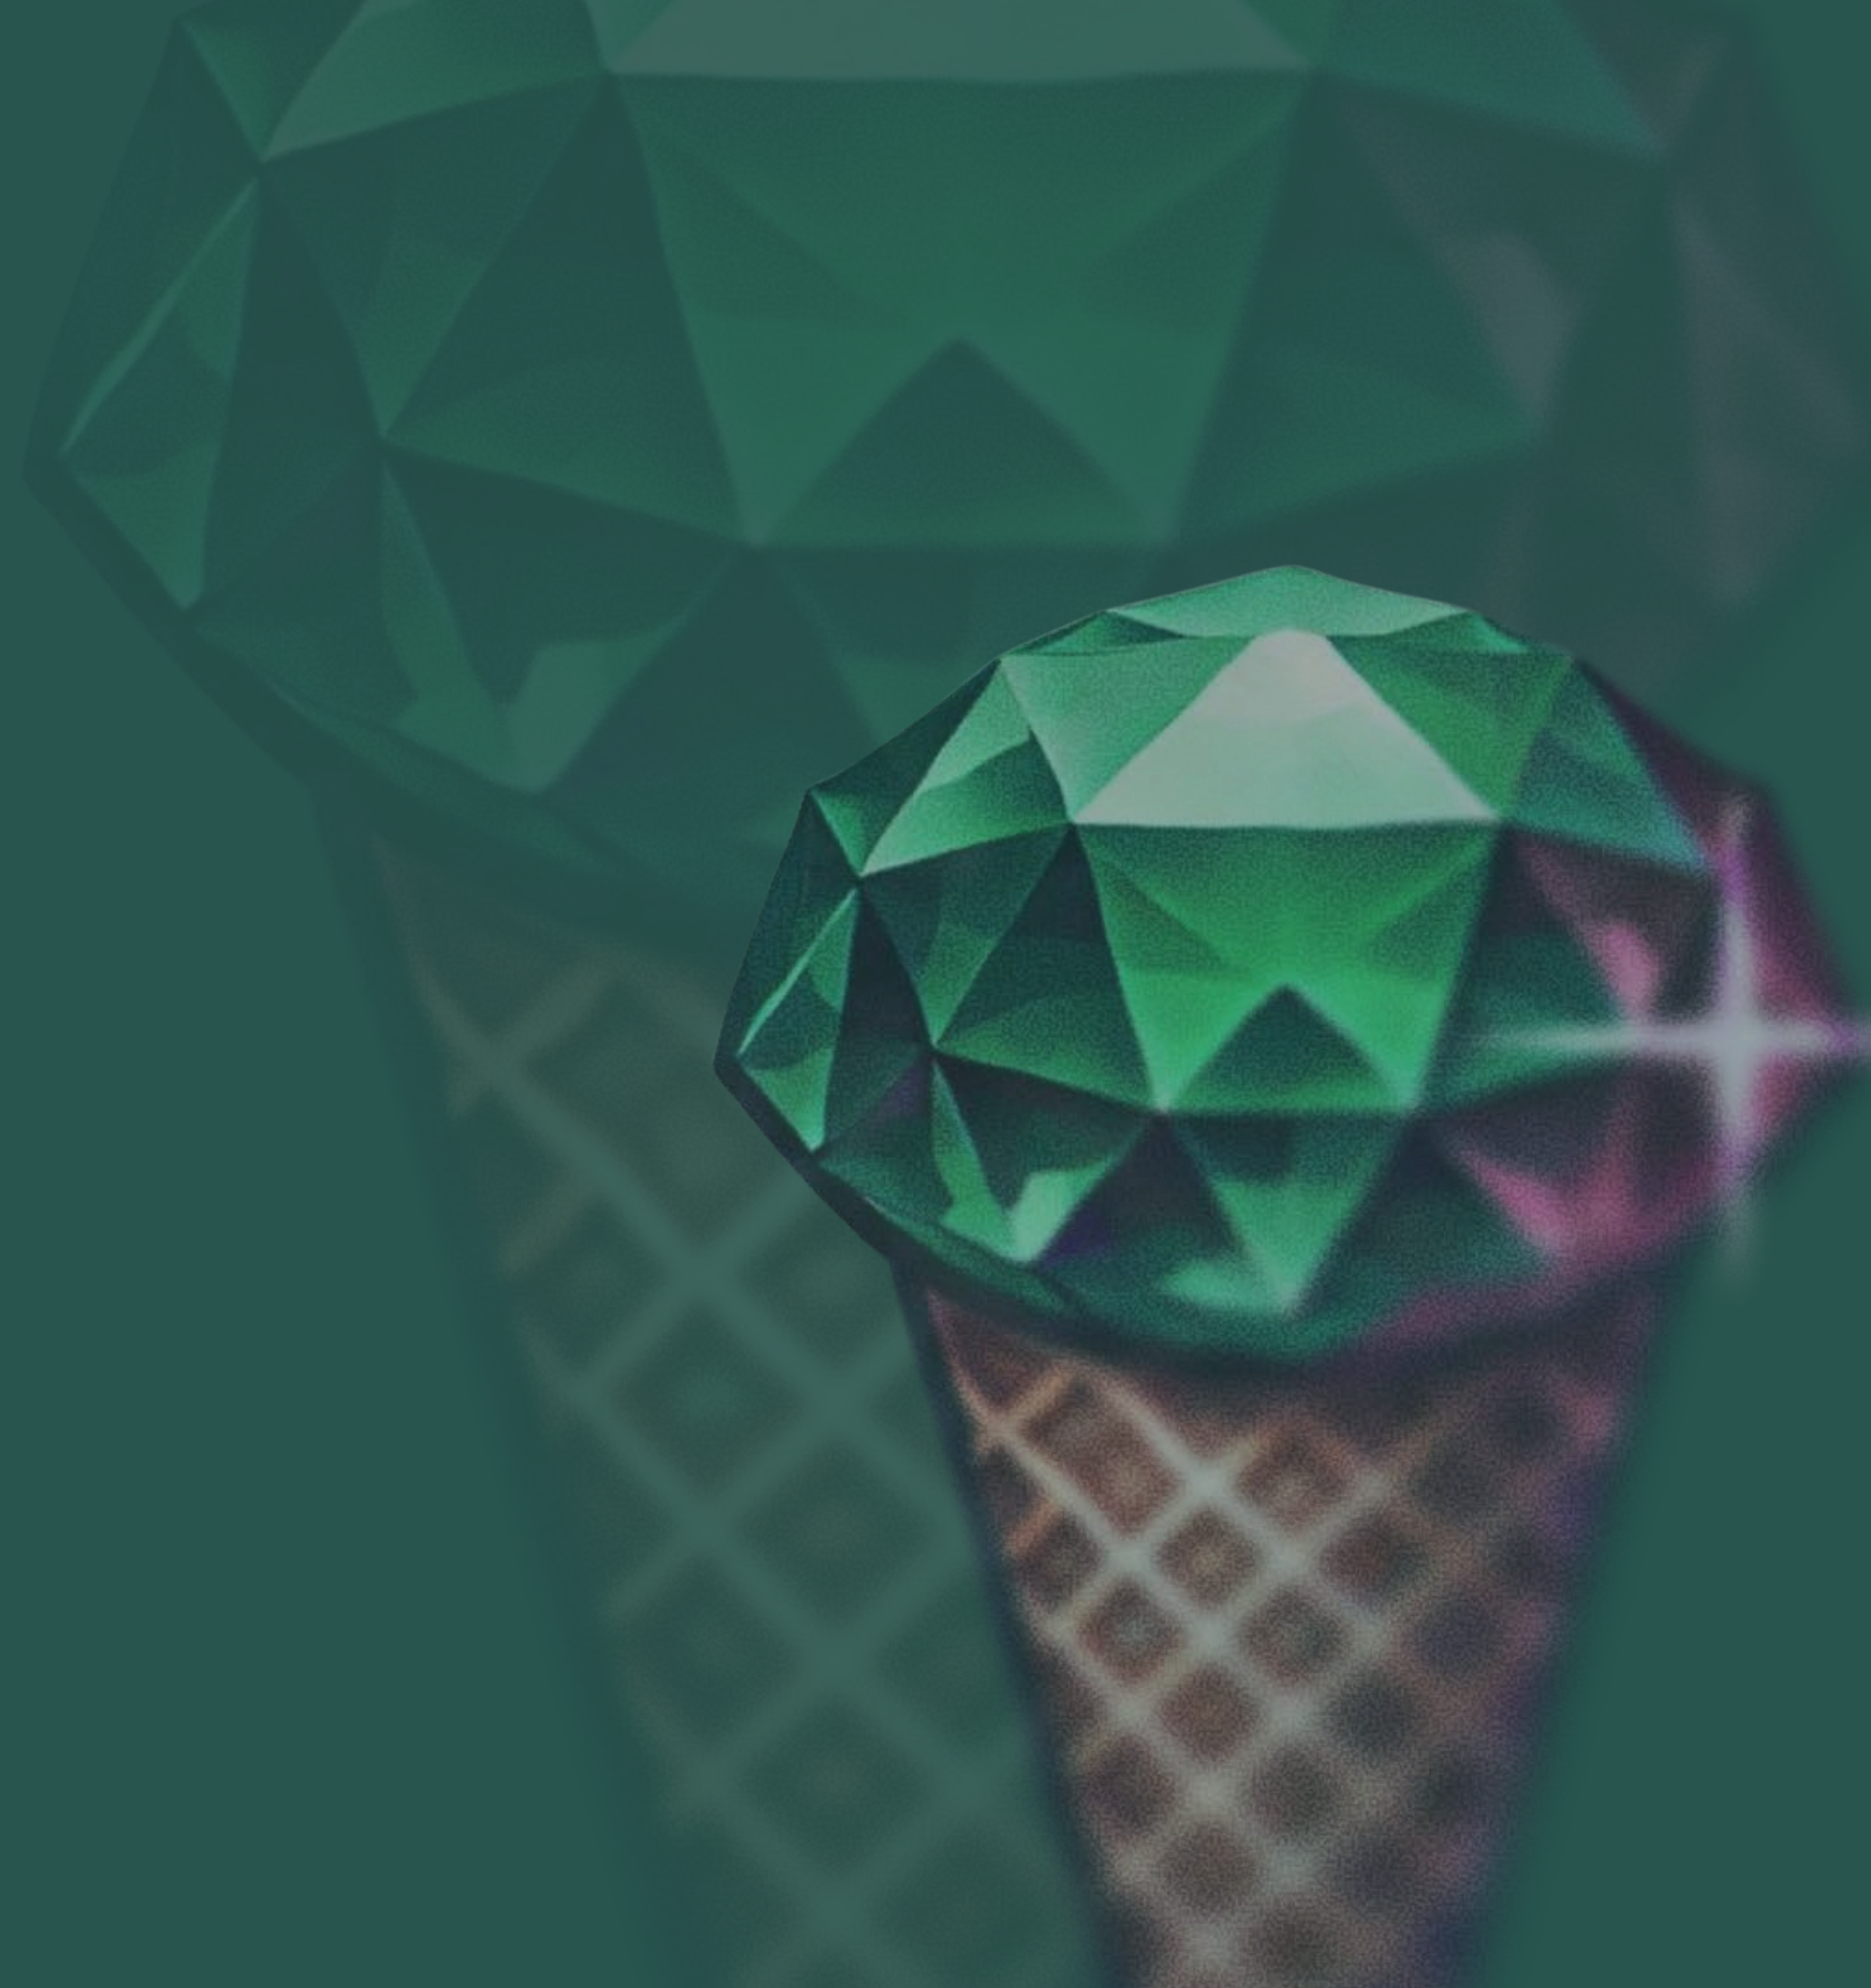

- Keep the main navigation simple and easy to understand
- Prioritize flavors, ordering, and store information
- Make allergens, reviews, and pricing easier to find
- Support both quick user tasks and brand storytelling

DESIGN EVOLUTION

Comparison across low-fidelity, mid-fidelity, and high-fidelity stages

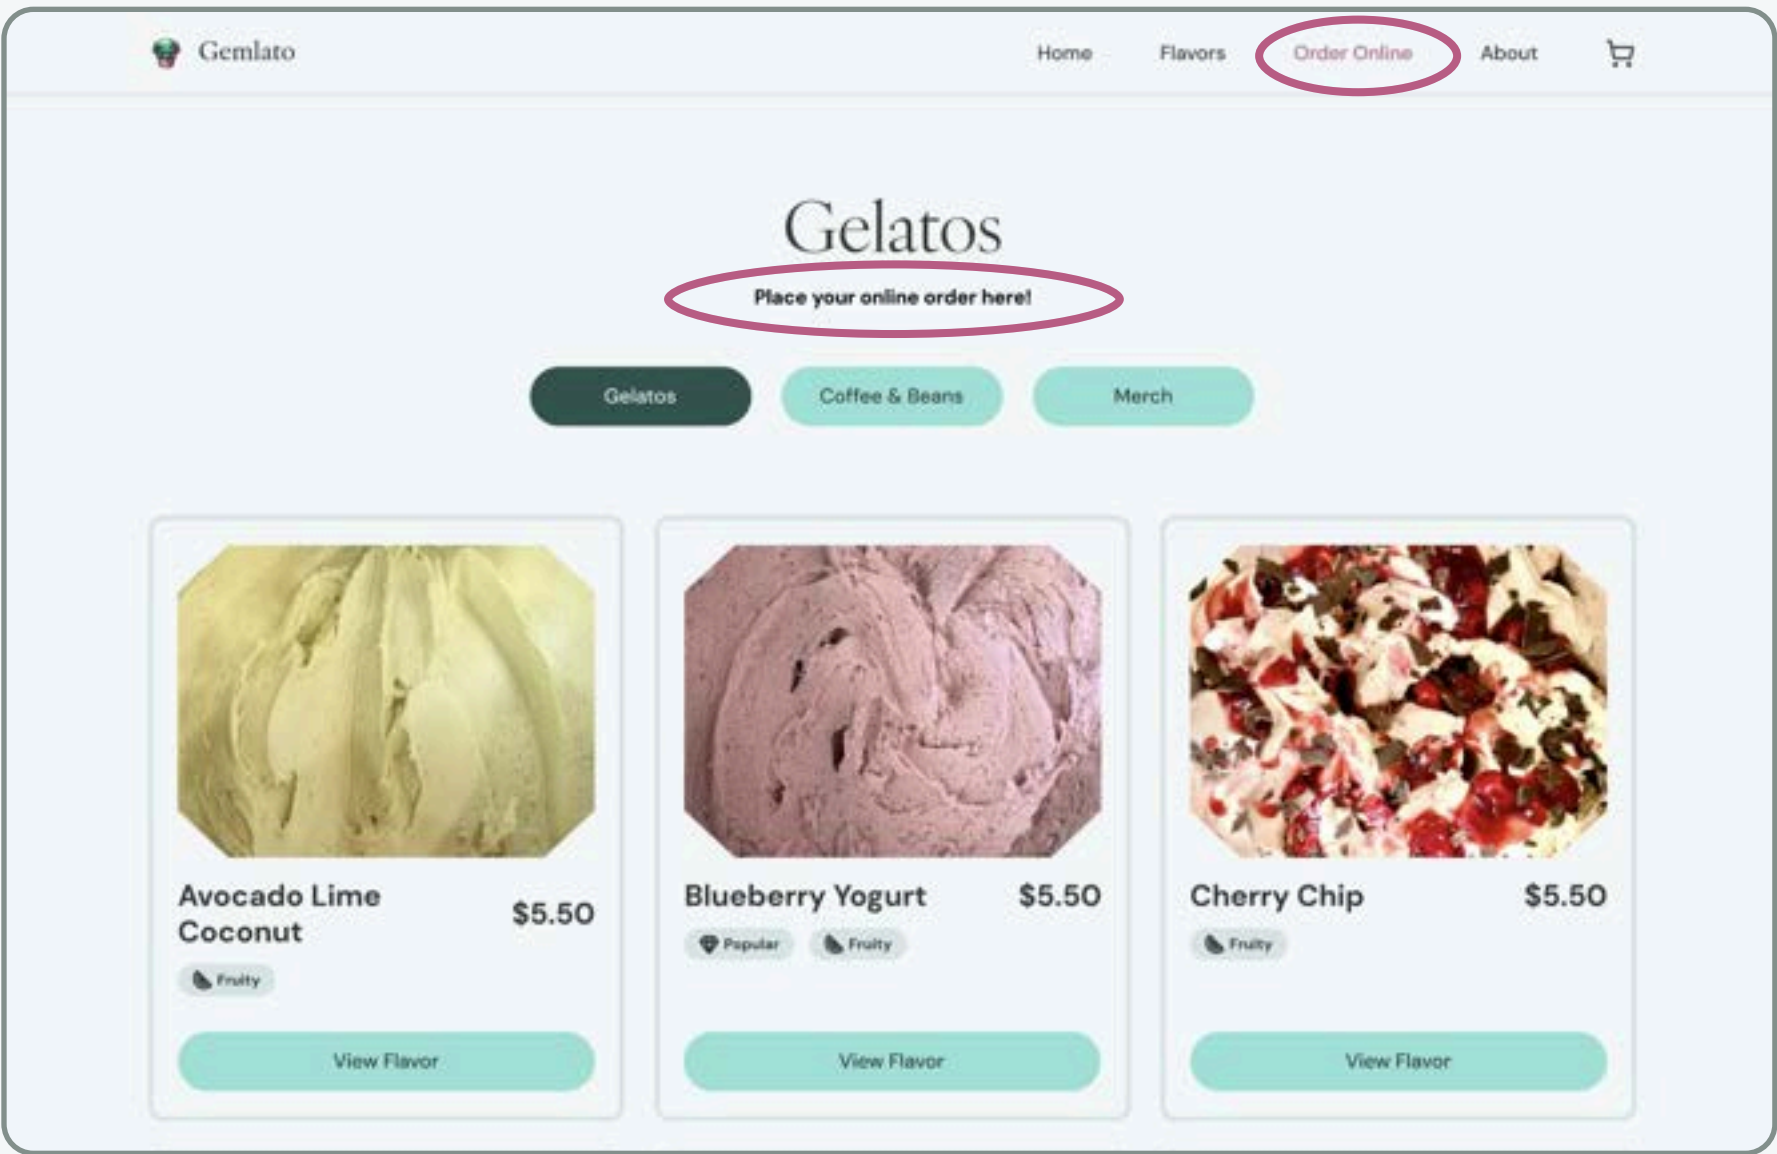

Iteration Highlights

Users expressed confusion of the purpose of the Flavors and Online Shops page.

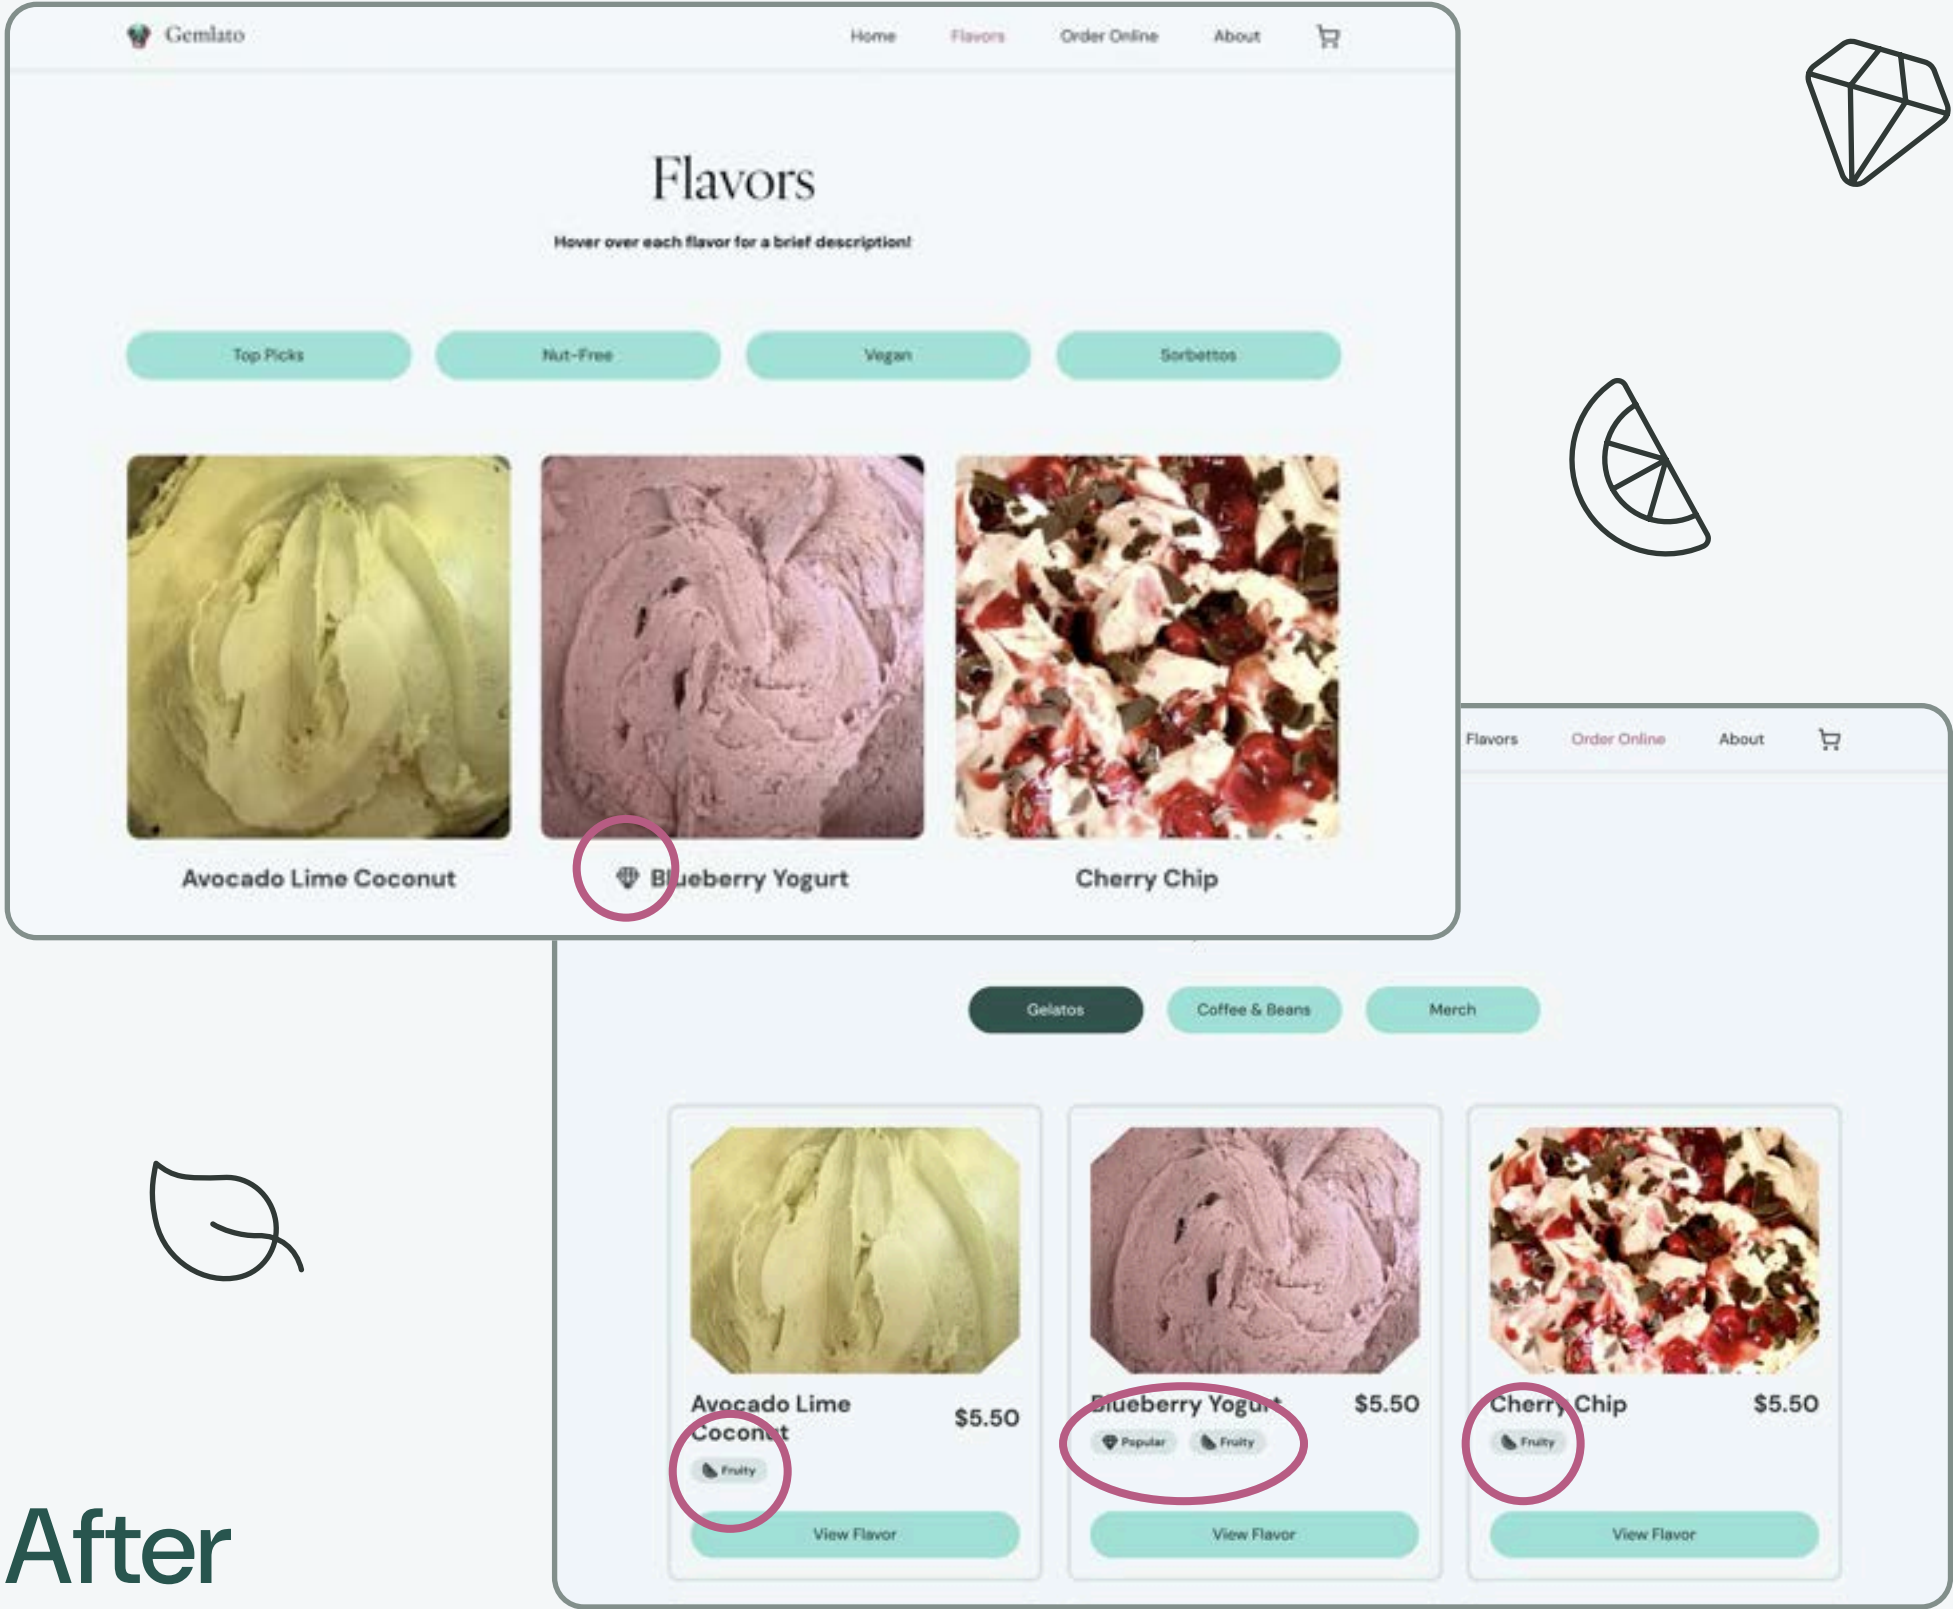

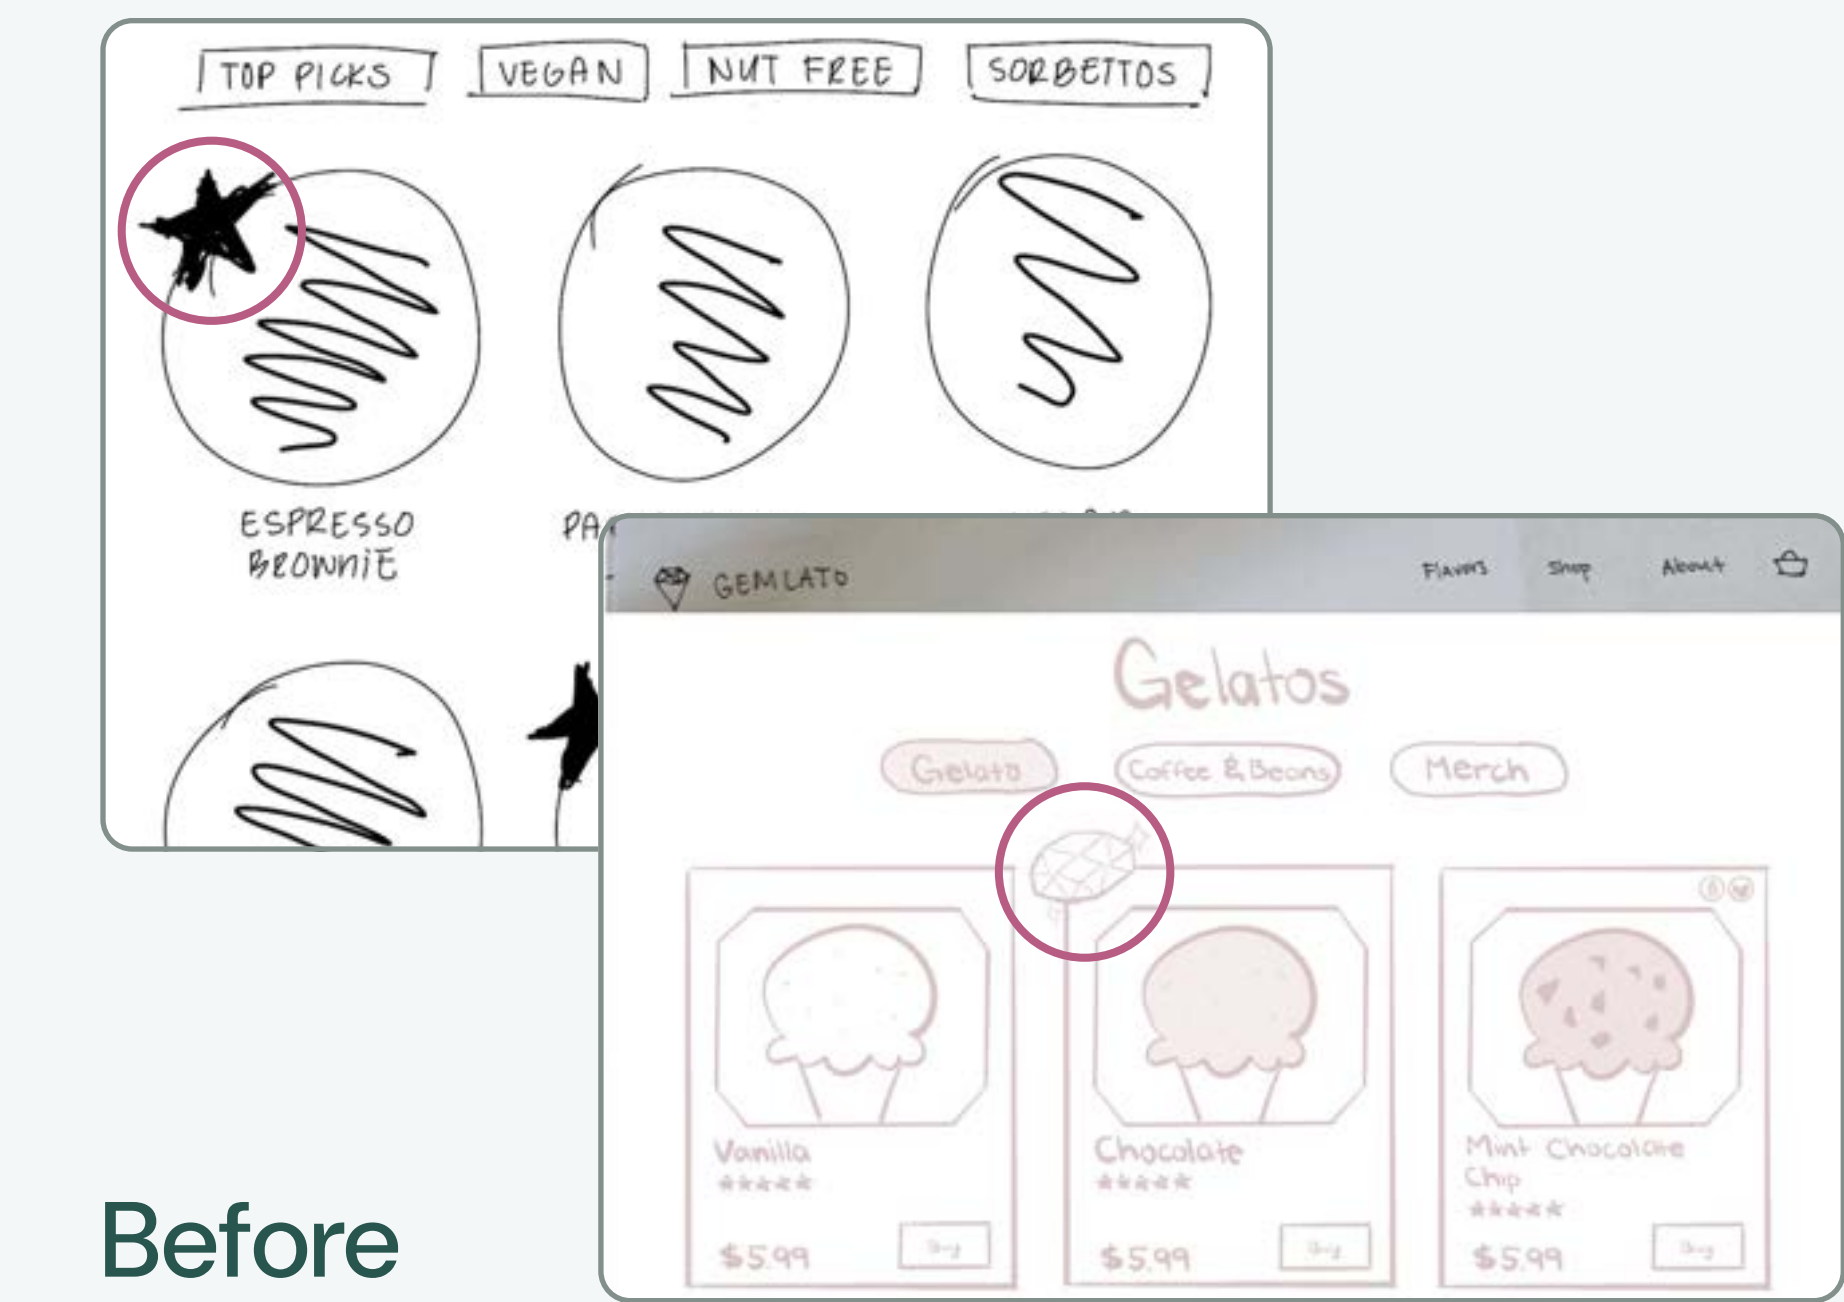

Before

After

User Testing

Users were unsure of the purpose of the different icons used throughout the site.

Refined the “-” & “+” to clearly communicate it’s status

Team & Process

Teamwork Makes The Dream Work

Even distribution of tasks for better individual ownership

In-person coordination for better collaboration and project direction

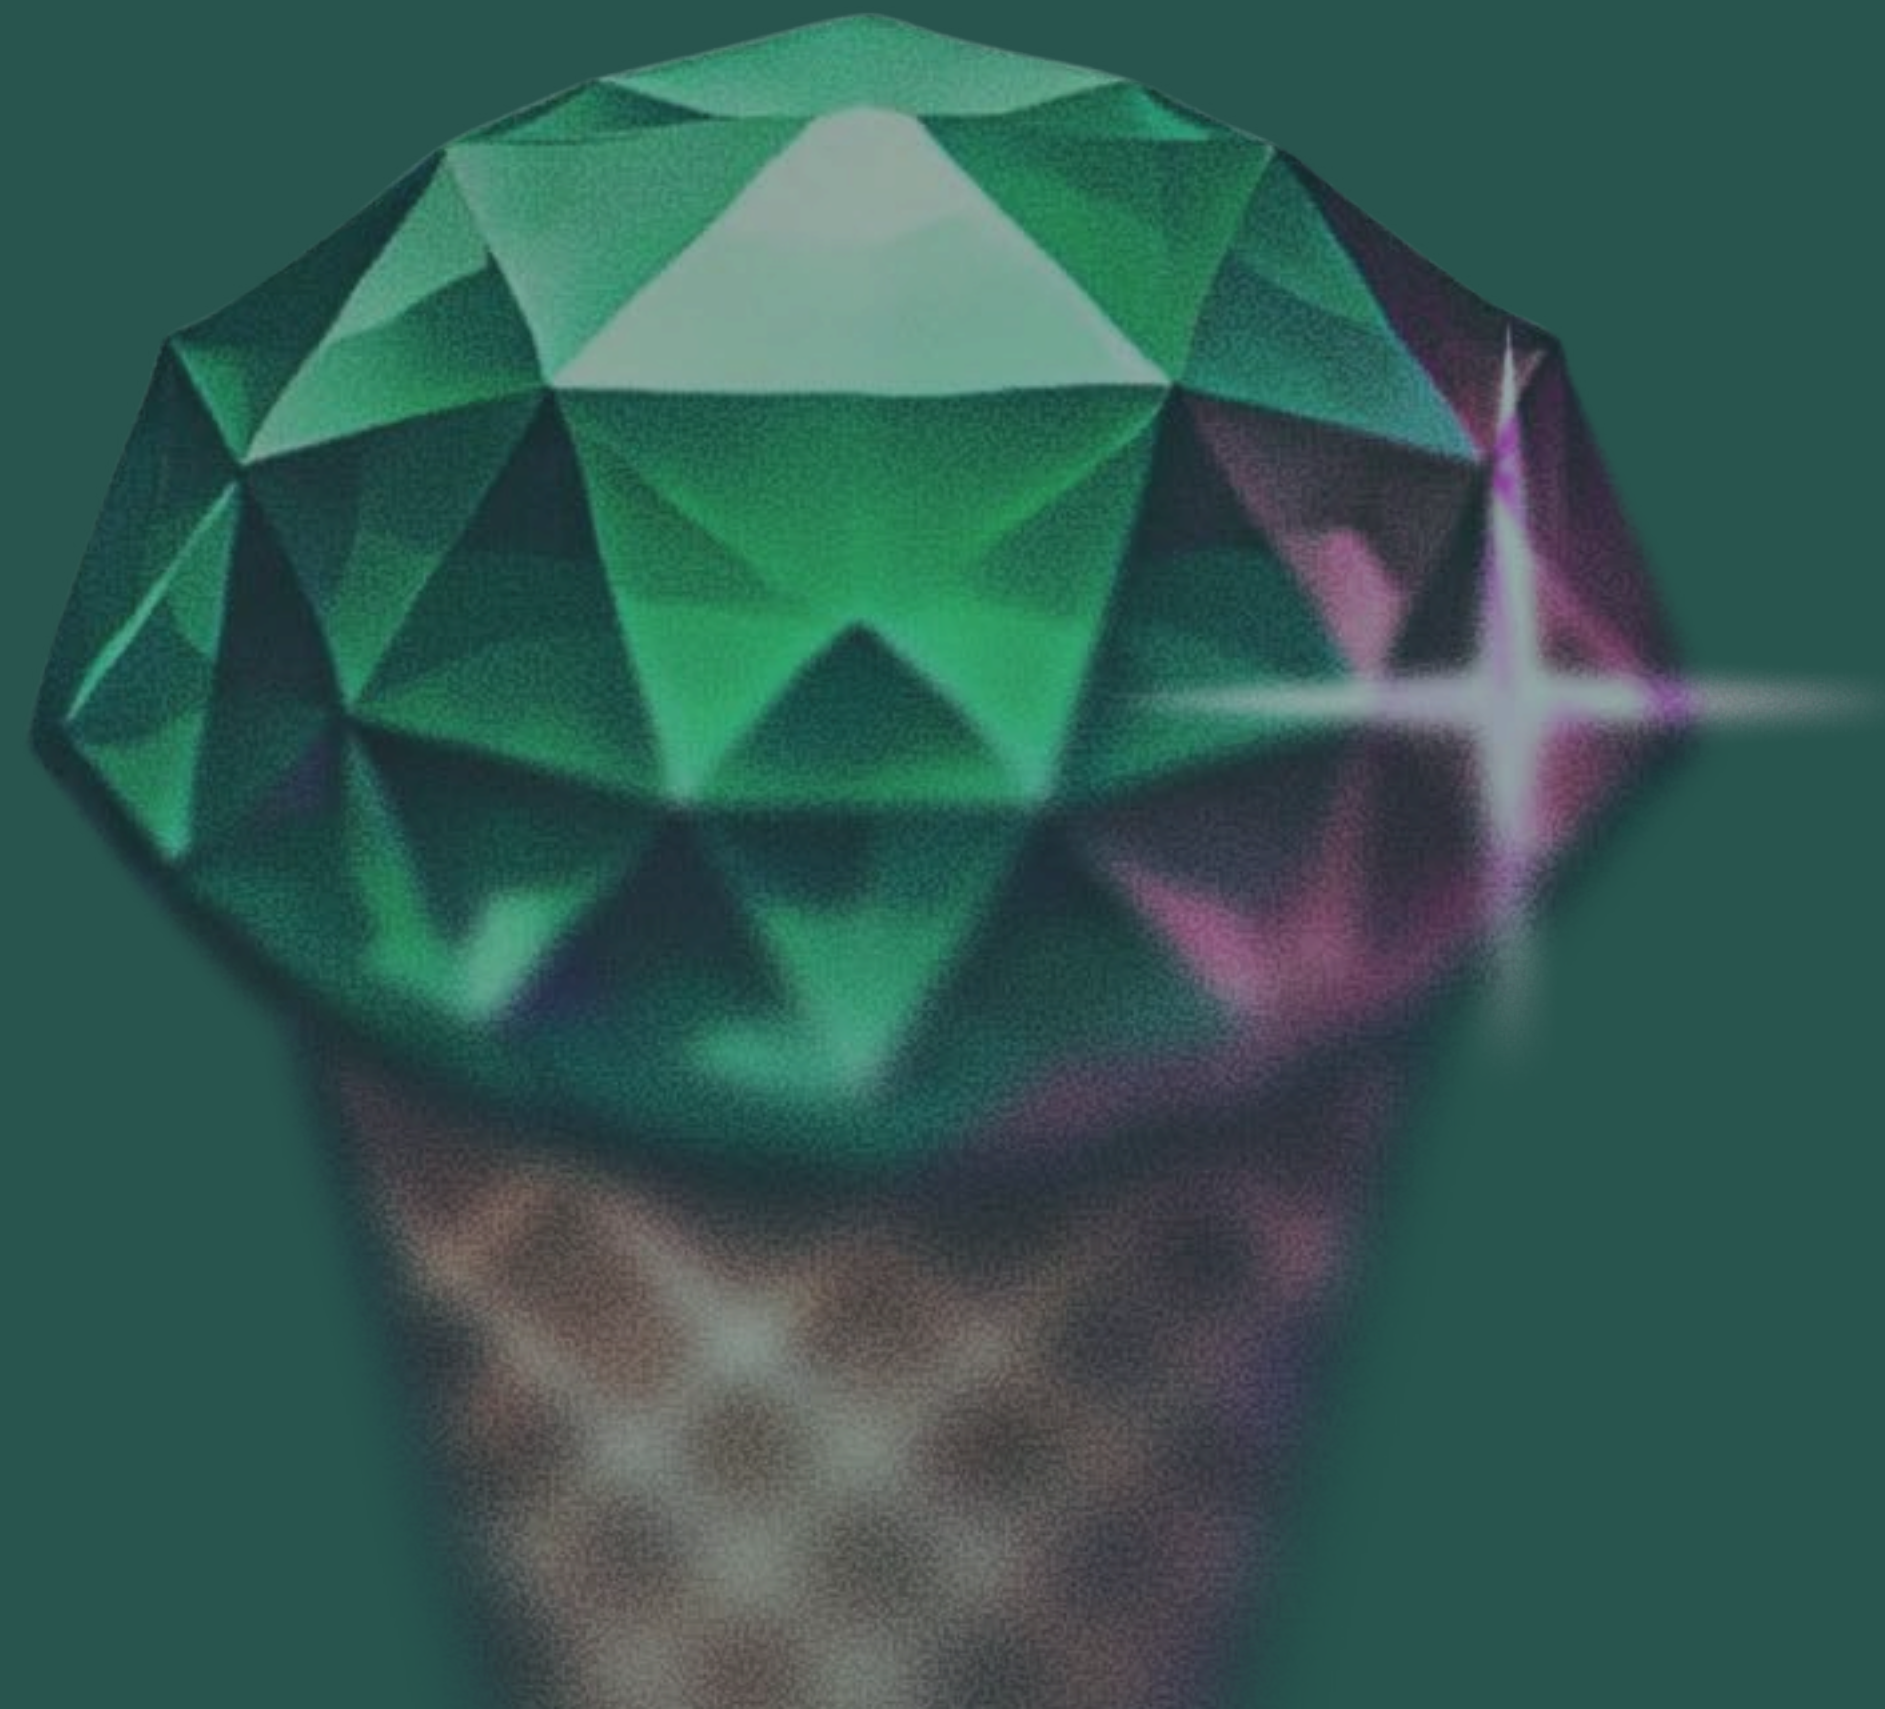

Better and earlier alignment for scheduling and creating timelines

Clearer client expectations for less ambiguity

Impact & Reflection.

Take A Moment to Reflect

The journey
needs some
improvements...

Exploration. Sometimes people don't want something else until they see it.

Camaraderie & conversation. More time for downtime helps shed nerves.

?

!

Take A Moment to Reflect

...and had its major accomplishments...

Deep search. Thorough research utilizing a variety of methodologies gave us a soft landing for designing.

A for Enthusiasm. Team’s devotion to discussion and feedback enabled thoughtful decisions.

Take A Moment to Reflect

...and its key learnings
at the end!

:)

SLOcal Immersion. Learning more about the community and their habits taught us more about locals' behavior + preferences.

Walk before you run. Taking the time for harder research or analysis makes the later design work easier + more foolproof.

All's well that ends well. Delivered a research-backed solution that offers locals a user-friendly, informative product for a sweet treat.

THAT'S ALL FROM US!
